QUESTION 1

DRAG DROP

You need to configure an unattended file for operating system deployments from Server201 and Server301.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

From Windows System Image Manager, create a new file.

Install Windows Assessment and Deployment Kit (Windows ADK) for Windows 8.1.

From Windows System Image Manager, select a Windows image.

From Deployment Workbench, import an operating system.

From Deployment Workbench, create a deployment share.

From Deployment Workbench, create a task sequence.

Answer Area

Correct Answer:

Actions

From Deployment Workbench, create a deployment share.

From Deployment Workbench, create a task sequence.

Answer Area

Install Windows Assessment and Deployment Kit (Windows ADK) for Windows 8.1.

From Deployment Workbench, import an operating system.

From Windows System Image Manager, select a Windows image.

From Windows System Image Manager, create a new file.

QUESTION 2

You need to identify which step must be included in all of the operating system deployment task sequences created on Server1. Which step should you identify?

- A. Validate
- B. Set Task Sequence Variable.
- C. Gather
- D. Use MDT Package.

Correct Answer: D

QUESTION 3

Your network contains one Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 R2.

Server1 is a Windows Deployment Services (WDS) server.

Computer technicians are allowed to configure disk partitions manually and to choose any operating system image when deploying an operating system by using WDS. All of the operating system images are in the same image group.

You purchase 10 new client computers.

You plan to deploy the same image of Windows 8.1 Enterprise to all of the computers.

You need to ensure that disk configuration and image selection for all of the computers is fully automated.

What is the best action to perform from Server1? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Run wdsutil end specify the /Add-Device switch for each client computer.
- B. Run wdsutil and specify the /Set-Server switch.
- C. Run wdsutil and specify the /Add-ImageGroup switch.
- D. Create computer objects in Active Directory for each new client computer.

Correct Answer: A

QUESTION 4

HOTSPOT

Your company has a main office and a branch office. The main office is located in Montreal. The branch office is located in Seattle. The offices connect to each other by using a WAN link. The WAN link is congested during business hours.

Each office has a high-bandwidth connection to the Internet.

The network contains one Active Directory domain named contoso.com. The relevant servers in the domain are configured as shown in the following table.

Server name	Location	Role
Server1	Montreal	Microsoft System Center 2012 R2 Configuration Manager site server
Server2	Seattle	File server

You need to use Server2 to perform an operating system deployment. The solution must minimize the amount of bandwidth used on the WAN link during business hours. What should you do? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Site role to deploy:

- Branch distribution point on Server2
- Cloud distribution point
- Distribution point on Server2

Server1 setting to enable:

- BITS
- Pull distribution point
- Rate limits

Correct Answer:

Answer Area

Site role to deploy:

Branch distribution point on Server2
Cloud distribution point
Distribution point on Server2

Server1 setting to enable:

BITS
Pull distribution point
Rate limits

QUESTION 5

You need to capture the SOE image.

You deploy Windows 8.1 Enterprise and all of the required applications to a new client computer in the New York City office.

What should you do next?

- A. Run sysprep.exe /unattend:sysprep.xml.
- B. Create a Windows Deployment Services (WDS) capture image.
- C. Run sysprep.exe /oobe.
- D. Create a Configuration Manager capture task sequence.

Correct Answer: C
