QUESTION 1

You enable Hyper-V on a company's Windows 10 Enterprise client computers.

You need to configure the computers' virtual switches. You have the following requirements:

Accounting department users require that virtual machine traffic does not communicate with any client computer.

HR department users must be able to copy files only from their client computer to their virtual machines.

IT department users must be able to copy files from network servers.

Finance department virtual machines must be able to communicate only with other virtual machines on the same client computer.

Which type of virtual switch should you use in each department? To answer, drag the appropriate switch type to the corresponding department. Each switch type may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

virtual switches

External

Internal

Private

Answer Area

Accounting

HR

IT

Finance

Four empty dashed rectangular boxes for placing the virtual switch types, corresponding to Accounting, HR, IT, and Finance.

Correct Answer:

virtual switches

External
Internal
Private

Answer Area

Accounting

Private

HR

Internal

IT

External

Finance

Internal

QUESTION 2

You connect a portable Windows 10 Enterprise computer to a corporate network by using a VPN connection.

You are unable to access websites on the Internet only when you are using the VPN connection.

You need to ensure that you can access websites when connected to the corporate network.

What should you do?

- A. In the TCP/IPv4 properties of the VPN connection, disable the Use default gateway on remote network setting.
- B. Configure the VPN connection to use only PPTP.
- C. In the TCP/IPv4 properties of the VPN connection, enable the Use default gateway on remote network setting.
- D. Configure the VPN connection to use only L2TP/IPSec.
- E. In the TCP/IPv4 properties of the local area connection, disable the Automatic metric setting.

Correct Answer: A

QUESTION 3

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

If a user deletes a file from OneDrive by using File Explorer, the file [answer choice].

cannot be restored
can be restored from onedrive.com
can be restored by using the Previous Versions tab

If a user deletes a file from a local drive by using File Explorer, the file [answer choice].

cannot be restored
can be restored from onedrive.com
can be restored by using Previous Versions tab

Correct Answer:

Answer Area

If a user deletes a file from OneDrive by using File Explorer, the file [answer choice].

cannot be restored
can be restored from onedrive.com
can be restored by using the Previous Versions tab

If a user deletes a file from a local drive by using File Explorer, the file [answer choice].

cannot be restored
can be restored from onedrive.com
can be restored by using Previous Versions tab

QUESTION 4

You administer Windows 10 Enterprise client computers in your company network.

A guest at your company is connected to the Internet as shown in the following exhibit. (Click the exhibit button.)

The screenshot shows the Windows network settings interface. At the top, it says "View your basic network information and set up connections". Below that, it says "View your active networks". There are two network profiles listed: "Network" (Private network) and "Access type: Internet". Under "Network", it says "Connections: Ethernet".

You need to ensure that the guest user is able to share network resources over Wi-Fi without lowering the overall security of the computer. What should you do?

- A. Configure File and printer sharing settings for Public networks.
- B. Change the network location type to Private.
- C. Change the network location type to Work.
- D. Configure File sharing connections settings for All networks.

Correct Answer: D

QUESTION 5

As part of its upgrade to Windows 10 Enterprise, your company is implementing additional security controls relating to data access.

You need to implement a solution that meets the following requirements:

Which feature should you use to meet each requirement? To answer, drag the appropriate feature or features to the correct requirement or requirements. Each feature may be used once, more than once, or not at all. You may need to drag

the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Features

- NTFS Permissions
- Remote Business Data Removal
- EFS
- BitLocker

Answer Area

Secure all data on local hard drives.

Limit users' ability to modify files.

Correct Answer:

Features

- Remote Business Data Removal
- EFS

Answer Area

Secure all data on local hard drives.

BitLocker

Limit users' ability to modify files.

NTFS Permissions
