### QUESTION 1

You have a deployment of System Center Configuration Manager (Current Branch).

Hardware inventory is enabled for all Configuration Manager clients.

You create a device collection named Collection1.

You need to include Trusted Platform Module (TPM) information in the hardware inventory of the devices in Collection1.

What should you configure in Configuration Manager?

- A. a configuration baseline
- B. the Client Device Settings
- C. hardware requirements
- D. a compliance policy

Correct Answer: B

---

### QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a deployment of System Center Configuration Manager (Current Branch).

You configure a cloud management gateway for Configuration Manager.

You have a client computer that is currently on the corporate network.

You need to force the computer to get the location of the cloud management gateway immediately.

Solution: You restart the SMS Agent Host service.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A

---

### QUESTION 3

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario.

You work for a company named ADatum Corporation.

The ADatum network contains an Active Directory domain named adatum.com.

You have a partner company named Contoso, Ltd. The Contoso network contains an Active Directory domain named adatum.com.

All the client computers at both companies run Windows 10.

Each company has a deployment of System Center Configuration Manager (Current Branch).

ADatum has sales and IT departments. ADatum has a collection for each department.

Contoso has research, marketing, and human resources (HR) departments. Contoso has a collection for each department.

ADatum purchases Contoso.

You configure on-premises mobile device management (MDM) in adatum.com. You enroll the client computers in the IT department into on-premises MDM.

You configure hybrid MDM in contoso.com.

End of repeated scenario.

You need to enroll the client computers in the sales department into MDM.

What should you do on the sales department computers?

- A. Install the Configuration Manager client.
- B. Run the Add-Computer cmdlet.
- C. Use the Settings app to connect the computers to a work or school account.
- D. Install the Microsoft Intune software client.

Correct Answer: C

---

### QUESTION 4

You have a deployment of System Center Configuration Manager (Current Branch).

You need to enable on-premises mobile device management (MDM) for the deployment.

Which three site system roles should you install? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Cloud management gateway connection point
- B. Enrollment proxy point
- C. Service connection point
- D. Enrollment point
- E. Certificate registration point

Correct Answer: BCD

#### QUESTION 5

Your company has offices in New York and Montreal.

You manage all desktop computers by using System Center Configuration Manager (Current Branch).

You need to perform the following tasks:

Redirect the Documents folder to a network share for all the users in the New York office.

In the Montreal office, configure all the computers that run Windows 10 Professional to run Windows 10 Enterprise.

What should you use in each office? To answer, drag the appropriate options to the correct offices. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

### Options

A configuration item

A configuration baseline

An edition upgrade policy

A user data and profiles configuration item

### Answer Area

New York:

Montreal:

Correct Answer:

### Options

A configuration item

A configuration baseline

### Answer Area

New York:

Montreal:

A user data and profiles configuration item

An edition upgrade policy
