QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a deployment of System Center Configuration Manager (Current Branch).

You configure a cloud management gateway for Configuration Manager.

You have a client computer that is currently on the corporate network.

You need to force the computer to get the location of the cloud management gateway immediately.

Solution: You restart the SMS Agent Host service.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 2

You upgrade a System Center Configuration Manager (Current Branch) site by using Updates and Servicing. You do not upgrade the Configuration Manager client.

You need to pilot the upgrade of the Configuration Manager client on 10 percent of the computers.

What should you do?

A. Create a collection that contains the pilot clients. From the Hierarchy Settings Properties, configure the Client Upgrade settings. Modify the setting for the production client.

B. Create a collection that contains the pilot clients. From the Hierarchy Settings Properties, configure the Client Upgrade settings. Modify the setting for the pre-production client.

C. In the Site Maintenance settings, modify the Clear Install Flag maintenance task. From the Hierarchy Settings Properties, configure the Client Upgrade settings. Modify the settings for the production client.

D. Create an Active Directory security group that contains the pilot clients. In the Site Maintenance settings, modify the Update Application Available Targeting maintenance task.

Correct Answer: B

QUESTION 3

You have a deployment of System Center Configuration Manager (Current Branch) that was implemented by a user named Admin1. Configuration Manager includes the administrative users shown in the following table:

User name	Security role	Security scope
User1	Infrastructure Administrator	Default, Scope1
User2	Asset Manager	Scope1
User3	Full Administrator	Default
User4	Operating System Deployment Manager	Scope1
User5	Operating System Deployment Manager	Default
User6	Operations Administrator	Scope1
User7	Operations Administrator	Default
User8	Company Resource Access Manager	Default, Scope1

You add a boot image named Boot1 to Configuration Manager. You set the security scope of Boot1 to Scope1. Which user can create a task sequence that uses Boot1?

- A. User4
- B. User5
- C. User7
- D. User1

Correct Answer: A

QUESTION 4

Your company has offices in New York and Montreal.

You manage all desktop computers by using System Center Configuration Manager (Current Branch).

You need to perform the following tasks:

Redirect the Documents folder to a network share for all the users in the New York office.

In the Montreal office, configure all the computers that run Windows 10 Professional to run Windows 10 Enterprise.

What should you use in each office? To answer, drag the appropriate options to the correct offices. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Options

A configuration item

A configuration baseline

An edition upgrade policy

A user data and profiles
configuration item

Answer Area

New York:

Montreal:

Correct Answer:

Options

A configuration item

A configuration baseline

Answer Area

New York:

Montreal:

A user data and profiles
configuration item

An edition upgrade policy

QUESTION 5

You have a deployment of System Center Configuration Manager (Current Branch).

Microsoft Office 365 ProPlus is deployed to all client computers.

You need to ensure that all updates for Office 365 are deployed from Configuration Manager by using the least amount of administrative effort.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create an automatic deployment rule (ADR)
- B. Add a product to the software update point
- C. Create a configuration baseline
- D. Create an application
- E. Update the Client Settings
- F. Create a task sequence

Correct Answer: ABE
