### QUESTION 1

Your customer has 4,000 Widows-based network devices.

You need to recommend a tool to collect software deployment inventory.

Which tool should you recommend?

- A. Microsoft License Advisor (MLA)
- B. System Center Configuration Manager (ConfigMgr)
- C. Microsoft Software Inventory Analyzer (MSIA)
- D. System Center Operations Manager (OpsMgr)

Correct Answer: B

Use software inventory in System Center 2012 Configuration Manager to collect information about files that are contained on client devices in your organization. Additionally, software inventory can collect files from client devices and store these on the site server. Software inventory is collected when the Enable software inventory on clients setting is enabled in client settings. After software inventory is enabled and the clients run a software inventory cycle, the client sends the inventory information to a management point in the client's site. The management point then forwards the inventory information to the Configuration Manager site server, which stores the inventory information in the site database. Software inventory runs on clients according to the schedule that you specify in client settings.

Incorrect Answers:

A: Use License Advisor to research Microsoft Volume Licensing products, programs and pricing. Get a full quote that you can share with colleagues or your reseller.

C: MSIA was scheduled to be retired at the end of June 2011. References: <https://technet.microsoft.com/en-us/library/gg682049.aspx>

### QUESTION 2

Your organization implements a SAM program.

You observe the following issues:

Users install unauthorized software on their computers.

Department managers purchase Software-as-a-Service (SaaS) subscriptions on their corporate credit cards without approval.

You need to implement a solution to resolve the issues. The solution must meet the following requirements:

Minimize disruption to business activities.

Minimize costs

Minimize recurrence of observed issues.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Implement a SAM employee training and awareness program.
- B. Implement System Center Configuration Manager (ConfigMgr).
- C. Implement System Center Operations Manager (OpsMgr).
- D. Sign a Volume Licensing Agreement with Microsoft.
- E. Implement a centralized purchasing process.

Correct Answer: CE

Asset Intelligence inventories and manages software license usage.

---

### QUESTION 3

Your customer has a SAM program. The customer installs SAM tools that monitor approved software installations.

You need to monitor whether the customer adheres to approved software installation policies.

What should you do?

- A. Perform quarterly license metering verifications.
- B. Perform quarterly inventory verifications.
- C. Perform quarterly hardware inventory verifications.
- D. Perform quarterly human resources audits for new employees.

Correct Answer: B

---

### QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You represent a SAM partner.

A client must consolidate their IT departments into a single business unit. The client was previously assessed in the Microsoft SAM Optimization Model (SOM) key competencies and assigned the maturity level of Standardized.

You need to ensure that the client progresses to the next SOM level in the Deployment Process key competency.

What should the client do?

- A. Purchase software only from approved vendors.

- B. Publish software deployment reports to stakeholders.
- C. Use information provided by a software publisher.
- D. Use software metadata generated by the client.
- E. Deploy only approved software.
- F. Formulate a retirement process.
- G. Create an inventory of deployed assets.
- H. Maintain updated records of deployed assets.

Correct Answer: B

#### QUESTION 5

Your software acquisition policy includes the following statements:

Receiving must be managed.

Purchasing must be centralized.

You need to improve the software acquisition policy.

Which process should you add to the policy?

- A. Purchase from only approved software vendors.
- B. Collect all historical purchasing information.
- C. Purchase from any software vendor.
- D. Collect all historical proof of licenses (POLs).

Correct Answer: A

"Standardized software purchase policies" belongs to purchasing in Basic SAM.
