QUESTION 1

You have a technician computer named Computer1 and a reference computer named Computer2.

You plan to customize the profile settings on Computer2 by logging on to Computer2.

You need to ensure that the current user profile is copied to the default user profile before the image of Computer2 is captured.

To which configuration pass in the unattended answer file should you add the CopyProfile settings?

- A. OfflineServicing
- B. specialize
- C. oobeSystem
- D. windowsPE
- E. generalize
- F. auditUser
- G. auditSystem

Correct Answer: B

QUESTION 2

You are preparing the hard disk drive for a Unified Extensible Firmware Interface (UEFI)- based computer.

You start computer from a Windows Preinstallation Environment (Windows PE) environment.

You need to ensure that you can start Windows from the hard disk drive.

Which command should you use?

- A. Bcdboot
- B. Bootsect
- C. Diskpart
- D. Bcdedit

Correct Answer: C

You need to create a GPT formatted drive.

QUESTION 3

You work for an OEM system builder.

You use Windows Deployment Services (WDS) to deploy operating system images.

WDS contains a 32-bit boot image.

You receive a new client computer model that is 64-bit.

You add a 64-bit install image of Windows to WDS.

You attempt to deploy the new install image to the new computer model by using WDS. The boot image loads on the new computer, but you fail to apply the install image.

You discover that from the boot image on the new computer, you cannot connect to the WDS server.

You need to ensure that you can deploy the new install image to the new computer model.

What should you do?

- A. Inject the 64-bit driver for the network adapter into the install image.
- B. Inject the 32-bit driver for the network adapter into the boot image.
- C. Inject the 64-bit driver for the network adapter into the boot image.
- D. Inject the 32-bit driver for the network adapter into the install image.

Correct Answer: C

QUESTION 4

You install Windows on a computer named Computer1.

You add an answer file to Computer1 that modifies the user experience when the computer starts for the first time.

You plan to capture Computer1 and then deploy the image to several computers.

You need to verify the user experience when the computer starts for the first time.

What should you run on Computer1? To answer, select the appropriate option for each list in the answer area

Hot Area:

Answer Area

Setup.exe	/audit	/reboot
Sysprep.exe	/generalize	
Userinit.exe	/oobe	
Wininit.exe		

Correct Answer:

Answer Area

Setup.exe	/audit	/reboot
Sysprep.exe	/generalize	
Userinit.exe	/oobe	
Wininit.exe		

QUESTION 5

Your company plans to implement a deployment environment.

The company identifies the following requirements for the planned implementation:

A manager at the company recommends deploying generalized images from a network share.

You need to identify which requirements the recommendation meets.

Which two requirements should you identify? Each correct answer presents part of the solution.

- A. Automatically start the deployment only when 10 computers are ready for installation.
- B. Ensure that all customers accept the EULA the first time they start their computer.
- C. Use the least amount of network traffic to deploy images.
- D. Install multiple computers simultaneously.

Correct Answer: BD
