QUESTION 1

You have a WIM file that contains an image of Windows Server 2012 R2 Standard.

You need to change the edition of the image to Windows Server 2012 R2 Datacenter. This solution must minimize administrative effort.

What should you do?

- A. Run the Upgrade Assistant.
- B. Perform offline maintenance of the image by using Dism.
- C. Run Windows Anytime Upgrade.
- D. Deploy the image to a client computer, perform an in-place upgrade, and then capture an image of the computer.

Correct Answer: B

QUESTION 2

You purchase a System Builder pack for Windows 10 Pro and plan to perform an installation by using a Personal Use License. What should you do first to receive support for the installation?

- A. change the license
- B. contact a Microsoft Authorized Distributor
- C. contact Microsoft
- D. contact the OEM system builder

Correct Answer: B

You need to purchase a full retail license for personal use.

QUESTION 3

You need to prepare a hard disk for a Unified Extensible Firmware Interface (UEFI)-based computer. Which three actions should you perform? (Each correct answer presents part of the solution.)

- A. Format the Windows partition by using NTFS.
- B. Format the Windows partition by using FAT32.
- C. Create an EFI partition.
- D. Convert the hard disk to a GPT disk.

E. Mark the system partition as active.

Correct Answer: CDE

QUESTION 4

You have a server named Server1 that runs Windows Server 2012 and has the Windows Deployment Services server role installed.

You recently removed a third-party DHCP server from the network, and then installed the DHCP Server role on Server1.

You create a scope on Server1.

You discover that client computers attempting to receive a Windows 10 image fail to connect to Server1.

You verify that the client computers on the network can receive an IP address from Server1.

You need to ensure that the computers attempting to receive an image can connect to Server1.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. From the Windows Deployment Services console, click the DHCP tab, and then select the Do not listen on port 67 check box.
- B. From the Windows Deployment Services console, click the DHCP tab, and then select the Configure DHCP option 60 to indicate that this is also a PXE server check box.
- C. From the DHCP console, click Server Options, and then set the value of Option 66 to Server1.
- D. From the Windows Deployment Services console, click the PXE Response tab, and then set the value of the Delay in seconds to 3.
- E. From the DHCP console, click Server Options, and then set the value of Option 67 to install.wim.

Correct Answer: AB

QUESTION 5

You work for an OEM builder.

You create a custom image of Windows 10 for a customer. You deploy the image to 100 clients that are then shipped to a customer.

For recovery purposes, the customer requests that you provide removable media that contains the image.

What should you do?

- A. Create an image of a reference computer on a USB key by using a third-party imaging software.
- B. Inform the customer that the customer must download the custom image from the Microsoft Volume Licensing

Service Center (VLSC).

C. Create an image of a reference computer on a DVD by using a third-party imaging software.

D. Inform the customer that you are prohibited from providing a recovery solution for the custom image on removable media.

Correct Answer: D

You can provide a hard disk recovery solution for a custom image, but not removable media containing a custom image.
