QUESTION 1

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You create the working directories for the customization of a Windows Preinstallation Environment (Windows PE) image.

You need to modify the regional setting used in Windows PE.

What should you do first?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Correct Answer: B

QUESTION 2

You have a generalized image of the 64-bit version of Windows 10. The image is released to the Out-of-Box-Experience (OOBE).

You need to ensure that when the image is deployed to a computer, the computer starts in audit mode.

What should you do?

- A. Create an answer file, and then copy the answer file to the image.
- B. When the computer starts, press SHIFT+F10, and then run `sysprep.exe /audit`.
- C. Create a provisioning package, and then copy the provisioning package to the image.

D. When the computer starts, press SHIFT+F10, and then run imagex.exe.

Correct Answer: A

QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You install Windows 10 on several devices.

You need to add a trusted root certificate to the devices. You must achieve the goal without reinstalling Windows 10.

What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Correct Answer: F

QUESTION 4

You use an answer file to automate the installation of Windows 10.

You need to add your company's support information to computers that you deploy.

Which component should you add to the answer file?

- A. Microsoft-Windows-Setup
- B. Microsoft-Windows-PnpCustomizationsNonWinPE
- C. Microsoft-Windows-Shell-Setup
- D. Microsoft-Windows-Deployment

Correct Answer: C

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You run `dism.exe/Add-Package` once and specify the `/PackagePath` parameter for each folder that contains the updates.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
