QUESTION 1

You need to recommend a solution to meet the requirements for App2. What should you include in the recommendation?

- A. Active Directory Rights Management Services (AD RMS)
- B. Active Directory Federation Services (AD FS)
- C. Windows Azure Active Directory Rights Management Services
- D. Microsoft Forefront Identity Manager (FIM) 2010 R2

Correct Answer: B

QUESTION 2

Your company has a private cloud that contains a System Center 2012 infrastructure.

The network contains a Service Manager infrastructure and a Configuration Manager infrastructure.

You create a configuration baseline for desired configuration management.

You need to ensure that an incident is created automatically in Service Manager when a device is non-compliant

You install the Configuration Manager connector for Service Manager.

What should you do next?

- A. Create an incident template.
- B. Import the Configuration Manager Management Packs.
- C. Create a Desired Configuration Management Event Workflow Configuration.
- D. Create a service level objective (SLO) for the desired configuration management incident.

Correct Answer: C

A connector is required to bring data from Configuration Manager into Service Manager. From there, you create a Desired Configuration management Event Workflow. Using Connectors to Import Data into System Center 2012 - Service Manager <http://technet.microsoft.com/en-us/library/hh524326.aspx> How to Configure Desired Configuration Management to Generate Incidents <http://technet.microsoft.com/en-us/library/hh495577.aspx> Gol: <http://technet.microsoft.com/en-us/library/ff460938> In System Center Service Manager 2010 Service Pack 1 (SP1), you can import configuration baselines from System Center Configuration Manager 2007 by using a Configuration Manager connector. Then, you can configure Service Manager to create incidents for each Service Manager configuration item that is reported as noncompliant against the defined values. You can use the following procedures to configure incident management to automatically generate desired configuration management-based incidents. To configure incident management to automatically generate desired configuration management based incidents

1.

In the Service Manager console, click Administration.

2.

In the Administration pane, expand Workflows, and then click Configuration.

3.

In the Configuration pane, double-click Desired Configuration Management Event Workflow Configuration.

4.

In the Configure Desired Configuration Management Workflows dialog box, click Add. <http://technet.microsoft.com/en-us/library/ff460938.aspx>

QUESTION 3

Your company help desk uses System Center 2012 Service Manager to manage and track problems.

You need to ensure that the manager of the help desk is notified automatically when a high-priority incident is updated.

What should you configure? To answer, select the appropriate configuration in the answer area.

Hot Area:

Correct Answer:

QUESTION 4

You need to recommend which configurations must be performed to meet the backup requirements for Hyper-V. What should you recommend? (More than one answer choice may achieve the goal. Select the BEST answer.)

A.

Correct Answer: D

QUESTION 5

Your company has a datacenter in Los Angeles.

The datacenter contains a System Center 2012 Virtual Machine Manager (VMM) infrastructure. The VMM infrastructure contains a server named VMM1.

You have a host group named HostGroup1. HostGroup1 contains four virtualization hosts named Host1, Host2, Host3, and Host4.

You plan to provide users with the ability to deploy virtual machines by using the Self-Service Portal.

The company's security policy states that only the members of a group named VMMAAdmin1 can place virtual machines on Host1 and Host2 and only the members of a group named VMMAAdmin2 can place virtual machines on Host3 and

Host4. You need to recommend a cloud configuration to meet the requirements of the security policy.

What should you recommend?

- A. Create two host groups named HostGroup1\Group1 and HostGroup1\Group2. Create one cloud for each new host group. Move two servers to each host group
- B. Create a host group named HostGroup1\HostGroup2. Create one cloud for HostGroup1 and one cloud for HostGroup2. Move two servers to HostGroup2.
- C. Create two clouds named Private1 and Private2. Configure the custom properties of each cloud.
- D. Create two clouds named Private1 and Private2. Configure placement rules for HostGroup1.

Correct Answer: A
