### QUESTION 1

You are implementing System Center 2012 R2.

You have four servers named Server1, Server2, Server3, and Server4 that run Windows Server 2012 R2. You install Operations Manager on Server1 and Data Protection Manager (DPM) on Server2.

You need to install the following System Center components:

A Service Manager data warehouse server

A Service Manager management server

Virtual Machine Manager (VMM)

App Controller

On which servers should you install each System Center component? To answer, select the appropriate component for each server in the answer area.

Hot Area:

**Answer Area**

Server1:

Server2:

Server3:

Server4:

Correct Answer:

**Answer Area**

Server1:

Service Manager data warehouse server

Service Manager management server

VMM

Server2:

App Controller

Service Manager data warehouse server

Service Manager management server

Server3:

App Controller

Service Manager data warehouse server

VMM

Server4:

App Controller

Service Manager management server

VMM

**QUESTION 2**

You need to implement the planned changes for the VMMSSP. What should you do?

- A. From the Services console, modify the properties of World Wide Web Publishing Service.
- B. From Internet Information Services (IIS) Manager, modify the web site bindings.
- C. From the Virtual Machine Manager console, modify the Network Settings.
- D. From the Microsoft System Center Virtual Machine Manager 2012 Setup Wizard, click the Install option.

Correct Answer: D

---

**QUESTION 3**

Your network contains an Active Directory domain. The domain contains two servers named Server1 and Server2. Server1 has System Center 2012 Virtual Machine Manager (VMM) installed. Server2 has System Center 2012 Operations

Manager installed.

---

You need to configure Operations Manager to monitor the VMM infrastructure.

Which three management packs should you install on Server2? (Each correct answer presents part of the solution. Choose three.)

- A. the Internet Information Services 7 Monitoring Management Pack
- B. the Microsoft SQL Server Monitoring Management Pack
- C. the File Services Management Pack
- D. the Windows Server Hyper-V Management Pack
- E. the Monitoring Pack for Active Directory (AD)
- F. the Windows Server Operating System Management Pack
- G. Windows Server DNS 2003/2008/2008 R2 Monitoring Management Pack

Correct Answer: ABF

---

#### QUESTION 4

Your network contains an Active Directory domain named contoso.com. The domain contains a domain controller named DC1 and a member server named Server1. You have a server named Server2 that is a member of a workgroup. All

servers run Windows Server 2012 R2.

Server1 has System Center 2012 R2 Operations Manager installed. DC1 is configured as an enterprise certification authority (CA). Server1 and DC1 are located on the internal network. Server2 is located on a perimeter network.

You need to monitor Server2 by using Operations Manager.

Which three actions should you perform? Each correct answer presents part of the solution.

- A. Request and install a certificate on Server2, and then import the certificate to Server1.
- B. Run the Discovery Wizard on Server1.
- C. Open port UDP 161 and UDP 162 on the firewall between the internal network and the perimeter network.
- D. Open port TCP 5723 on the firewall between the internal network and the perimeter network.
- E. Manually install the Microsoft Monitoring Agent on Server2.
- F. Request and install a certificate on Server1, and then import the certificate to Server2.

Correct Answer: ADE

---

#### QUESTION 5

You have a deployment of System Center 2012 R2 Virtual Machine Manager (VMM).

You have two virtual machines named Server1 and Server2 that run Windows Server 2012 R2.

You have an application named Appl.

You plan to deploy App1 to Server1 as an Application Virtualization (App-V) package.

You need to install the required components to deploy App1 to Server1.

Which component should you install on each server? To answer, drag the appropriate components to the correct servers. Each component may be used once, more than once, or not at all. You may

need to drag the split bar between panes or scroll to view content.

Select and Place:

Components	Answer Area
Application Integration Framework (AIF)	Server1: <input type="text" value="Component"/>
Monitoring Pack for App-V	Server2: <input type="text" value="Component"/>
Server App-V Agent	
Server App-V Sequencer	
VMM agent	

Correct Answer:

Components	Answer Area
Application Integration Framework (AIF)	Server1: <input type="text" value="Server App-V Agent"/>
Monitoring Pack for App-V	Server2: <input type="text" value="Server App-V Sequencer"/>
VMM agent
