

# 700-905<sup>Q&As</sup>

Cisco HyperFlex for Systems Engineers

## Pass Cisco 700-905 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.geekcert.com/700-905.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Cisco  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

#### QUESTION 1

Where is the VIC configuration for number type, identify, failover, settings, and bandwidth stored?

- A. in non-volatile memory on the VIC
- B. in UCS Manager service profiles
- C. in VCenter virtual machine image
- D. in UCS Manager server profiles

Correct Answer: D

---

#### QUESTION 2

How can the maximum 10 performance be achieved?

- A. Use the HX 220 with all flash drives
- B. Use the HX 240 with all flash drives
- C. Use the HX 220 with all SAS drives
- D. Use the HX 240 with all SAS drives

Correct Answer: B

---

#### QUESTION 3

Which two results are expected when you replace a node or expand a cluster? (Choose two.)

- A. Distributed pooled data is migrated off nodes to master data store.
- B. Affected node is marked as unhealthy and placed into standby mode
- C. vSphere DRS migrates the virtual machines to the new node to balance the load
- D. On node replace, the self-healing must finish for the cluster to be healthy
- E. The cluster profile is updated and RAID takes care of rebalancing the load.

Correct Answer: CD

---

#### QUESTION 4

There are often disadvantages when using mixed hardware, and uniform systems are highly advised. What are three

disadvantages of using validated yet mixed hardware? (Choose three.)

- A. "Hardware only" solutions require less latency for data aggregation.
- B. "Software only" solutions are inherently more secure, adhering to government regulations.
- C. "Software only" HCI solutions often mean that HCI vendors do not have control over the hardware that the consumer is using. The lack of control over the hardware can result in hardware not being security-compliant (usually the case with white box solutions) or not being optimally configured for the given HCI solution.
- D. Validated yet "mixed" hardware systems may be supported by the specific original equipment manufacturers but software vendors require a master level services agreement.
- E. "Software only" solutions can result in a lack of simplicity for installation and maintenance. While setup and maintenance of an HCI solution might be simple you still need to configure and maintain the hardware part, which is not orchestrated by the HCI solution.
- F. Validated hardware does not mean smooth performance, which particularly applies to hardware that is seldom chosen for the hardware part of the "software only" solution.

Correct Answer: CEF

---

#### QUESTION 5

Which three features do Managed Deployments provide? (Choose three.)

- A. Great for managing large deployments, scalability, and oversight of the UCS servers.
- B. Consistent deployment by replicating working configurations from development labs to the production deployment
- C. High availability of the management system and connectivity when using 2 Cisco Fabric Interconnects
- D. Individual configuration of each redundant fabric or global configuration.
- E. Increased operating overhead, raising Operating Expenses (OpEx)
- F. Decentralized yet complex management of an entire UCS domain.

Correct Answer: ACD
