A customer requires that Distinctive Ringing on a route be allowed. Which programming within the Customer Data Block (LD 15) indicates the number of times the call receive a distinctive ring before redirection?

A. RNGO, RNG1, RNG2

B. FNA0, FNA1, and FNA2

C. DFN0, DFN1, and DFN2

D. CRTO, CRT1, and CRT2

Correct Answer: C

QUESTION 2

When deploying ESA for IP telephones, a method for determining the location of the IP telephones is required. If you are deploying internally, what would one method be?

A. Deploy ESAPackage 382 (Virtual Office).

B. Deploy Location Information Services (US)

C. Deploy Discovery Manager (DM)

D. Deploy ESA Package 387 (Virtual OfficeEnhancement)

Correct Answer: C

QUESTION 3

A customer has deployed a Communication Server (CS) 1000 RIs. 7 x system at their site. They have asked you if the CS 1000 has a feature that can extend and ring calls to other locations. You have decided that Personal Call Assistant (PCA) will meet the customer\\'s requirements and verified that the system is equipped with Package 398, and that it has sufficient ISM parameters. Which step must be performed first when implementing PCA?

A. Locate or configureaSuperloop for PCA

B. Enable the PCA feature for the customer

C. Configure Flexible feature codes for PCA control

D. Configure the telephone parameters to support PCA

Correct Answer: B

QUESTION 4

Due to Directory Number conflicts in the Communication Server 1000 network, the customer wants to route

calls by Home Location Codes (HLOC) and Location Codes (LOCs).

Consider the following Home Location Codes.

HLOC for system A = 329

HLOC for system B = 429

What LOC should be provisioned for system A?

A. LOC for System A = 3

B. LOC for System A = 49

C. LOC for System A = 329

D. LOC for System A = 429

Correct Answer: D

QUESTION 5

With Automatic On-Net to Off-Net Overflow, if all on-net facilities such as TIE trunks between locations are busy, NARS can convert a dialed UDP number to a Listed Directory Number of the applicable DID number at that location and use off-net facilities, such as CO trunks, to complete the call. When provisioning Automatic On-Net to Off-Net Overflow, which parameter is not correct?

A. Only oneListed Directory Number can be defined per Location Code (LOC).

B. Multiple NPAs per Location Code are allowed.

C. Multiple NXXcodes per Location Code can be defined.

D. Multipleranges of DNs within each NXX per Location Code can he defined.

Correct Answer: D
