## QUESTION 1

Click the Exhibit button.

Roles		
User Roles provide group-level authentication functions and element permissions. Users with a given role may only perform functions that are authorized for that role		
<a href="#">Add...</a> <a href="#">Delete</a> <a href="#">Refresh</a>		
6	<u>MemberRegistrar</u>	0
All elements of type: IPsec Manager		
All elements of type: Linux Base		
7	<u>NetworkAdministrator</u>	1
All elements of type: Base OS		
All elements of type: CS1000		
All elements of type: CS1000 Bridge		
All elements of type: CallPilot Messaging		
All elements of type: Deployment Manager		
All elements of type: Hyperlink		
All elements of type: IPsec Manager		
All elements of type: Linux Base		
All elements of type: Non CS1000 Manual Device		
All elements of type: Network Routing Service		
All elements of type: Numbering Groups		
All elements of type: IM Presence		
All elements of type: Patching Manager		
All elements of type: Secure FTP Token Manager		
All elements of type: Smp Manager		
All elements of type: Subscriber Manager		
8	<u>Patcher</u>	0
All elements of type: Linux Base		
All elements of type: Patching Manager		

A customer has a Communication Server 1000 RIs. 7 x system with System Manager / Unified Management (UCM) enabled. They have requested the addition of two new UCM Administrator User with the limited ability to provision telephones at each site. Refer to the exhibit for the roles current existing in the system.

Which action can the Network Administrator take to add these new accounts per the customer's requirements?

- A. Change the built-in MemberRegister role to add the permissions required to allow telephone configuration.
- B. Assign the new users to the built-in NetworkAdministrator role because it has the permissions that allow telephone configuration.
- C. Change the built-in role Patcher role to remove all permissions except those that allow telephone configuration.
- D. Add a new TelephonyAdmin role with the specific permissions required to allow telephone configuration.

Correct Answer: D

## QUESTION 2

Click the Exhibit button.

You are adding ten digital telephones as required by a customer work order. The customer wants the user to see the calling or called name associated with the number dialed.

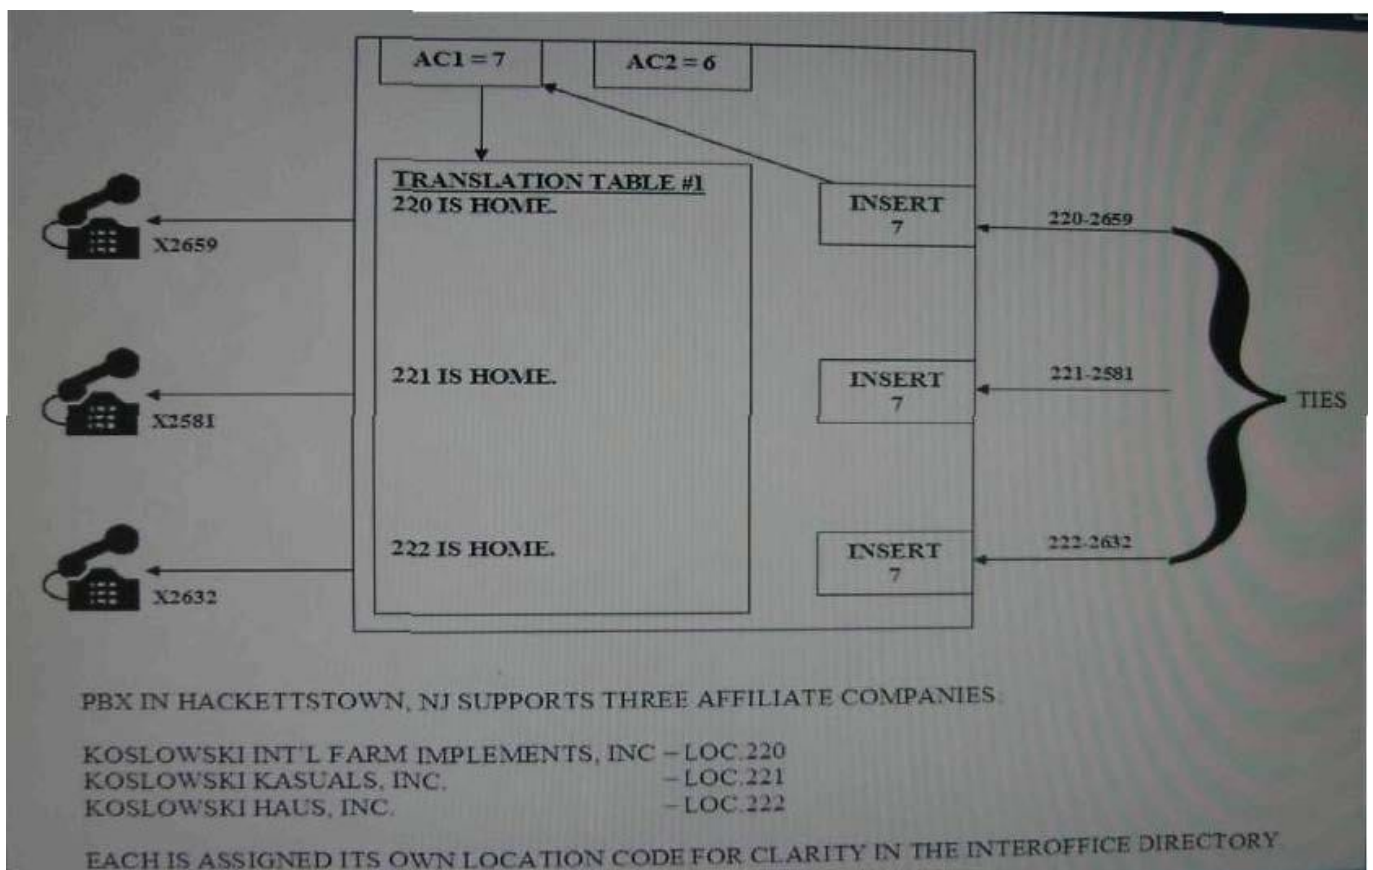

Which Customer Level feature from the list shown in the exhibit, must first be provisioned before you can enter names in at the station level?

- A. Call Redirection
- B. Feature Options
- C. Listed Directory Number
- D. Call Party Name Display

Correct Answer: D

### QUESTION 3

Click the Exhibit button.

Consider a company's dialing plan shown in the exhibit and an example for its requirements:

A station user at the company, with Location Code 221, placed an ESN call, dialing 7-221-2581. This would be an On-Net call and the NARS programming must remove the LOC code and dial the DN internally.

What programming would remove the location code for a call dialed within the originating Communication Server 1000 to a DN on that same Communication Server 1000?

- A. Each site would have its own Location Code programmed as a Home Location Code(HLOC) under Translation Table #1 in their CS 1000.
- B. The location codes for each site would be programmed under the LOC programming in Translation Table #2 at all locations.
- C. Home NPA Codes (HNPA) for each site would be programmed under Translation Table #1 at each location in their CS 1000.
- D. Each site would have the Location Codes for all sites programmed as Home Location Codes (HLOC) in Translation Table #1 of their CS 1000.

Correct Answer: A

---

#### QUESTION 4

A company recently deployed IP telephones in its Call Center. During peak traffic conditions, callers receive an overflow tone and calls are blocked.

Zone Number = 1 Zone Intent = MO Intrazone Traffic = Best Quality Interrone Traffic = Best Bandwidth Resource Type = Shared

Which programming change is recommended to provide dedicated Digital Signal Processor (DSP) resources to Contact Center IP telephones?

- A. Change Zone Intent VTRK
- B. Change Resource Type to Private
- C. Change Interzone to BestQuality
- D. Change InterzoneTraffic to Best Bandwidth

Correct Answer: B

---

#### QUESTION 5

Which IP Peer Networking component provides the centralized call routing for Communication Server 1000 systems in an Avaya Aura network solution?

- A. Call Manger
- B. System manager
- C. SessionBorder Controller
- D. Session Manager

Correct Answer: D
