QUESTION 1

Which of the following tasks can Logstash fulfill without using other components of the Elastic Stack? (Choose three.)

- A. Receive log data from remote systems.
- B. Store log data persistently.
- C. Aggregate log data over a period of time.
- D. Process log data to extract information.
- E. Forward log data to other services.

Correct Answer: ADE

QUESTION 2

Which section of the Prometheus configuration defines which nodes are monitored?

- A. scrape_config
- B. targets
- C. rules
- D. listener
- E. nodes

Correct Answer: A

Reference: https://prometheus.io/docs/prometheus/latest/getting_star

QUESTION 3

Which Ansible keyword is used in a playbook to store the result (i.e. return code) of a task in a variable?

- A. register
- B. return
- C. output
- D. result
- E. set_fact

Correct Answer: A

https://docs.ansible.com/ansible/2.5/user_guide/playbooks_conditionals.html

QUESTION 4

Which sections can exist in a Logstash configuration file? (Choose three correct answers.)

- A. output
- B. filter
- C. input
- D. forward
- E. generate

Correct Answer: ABC

<https://www.elastic.co/guide/en/logstash/current/configuration-file-structure.html>

QUESTION 5

The following command is issued on two docker nodes:

```
docker network create --driver bridge isolated_nw
```

Afterwards, one container is started at each node with the parameter `--network=isolated_nw`. It turns out that the containers can not interact with each other.

What must be done in order to allow the containers to interact with each other? (Choose two correct answers.)

- A. Use a host network instead of a bridged network.
- B. Add the option `--inter-container` to the docker network create command.
- C. Start the containers on the same node.
- D. Change the `--network` parameter of docker create to `--network=isolated_nw,nofence`.
- E. Use an overlay network instead of a bridged network.

Correct Answer: CE

<https://docs.docker.com/v17.09/engine/userguide/networking/#bridge-networks>
