QUESTION 1

Which docker subcommand starts a new container? (Specify only the subcommand without any path or parameters.)

A. run

Correct Answer: A

QUESTION 2

Which of the following benefits are realized by using immutable servers? (Choose TWO correct answers)

- A. Immutable servers are flexible in how they are configured during their deployment.
- B. Immutable servers are not connected to a network and cannot be attacked remotely.
- C. Immutacle servers are usable right after they are started without further configuration.
- D. Immutable servers bundle all components required for an application and never need external services.
- E. Immutable servers ensure production servers are identical staging servers.

Correct Answer: CE

QUESTION 3

Given the following excerpt of a Dockerfile:

```
Run apt-get -y update andand apt-get install -y fortunes andand apt-get clean
```

Why are the multiple apt-get commands combined in one RUN statement instead of using multiple RUN statements?

- A. To prevent the commands from running in parallel because Docker executes all RUN statements in their own container at the same time.
- B. To ensure the execution order of the commands because Docker might evaluate the statements of a Dockerfile in any order.
- C. To avoid the creation of unnecessary images because Docker creates a new image for each RUN statement.
- D. To execute both commands in the same container instance and void Docker to reset the container to the original base image.
- E. To execute the apt-get install command only if the apt-get update command was successful because Docker does not check the success of RUN statements.

Correct Answer: C

QUESTION 4

Which of the following functions are provided by the Ansible apt module? (Choose two correct answers.)

- A. Update an installed package to the latest version.
- B. Update the list of available packages from configured repositories.
- C. Re-compile an installed package from the source code.
- D. Add the URL of a new repository to the package manager configuration.
- E. Install a dpkg based Linux distribution on an empty target system.

Correct Answer: AB

https://docs.ansible.com/ansible/latest/modules/apt_module.html

QUESTION 5

Which git sub command copies a local commit to a remote repository? (Specify ONLY the sub command without any path or parameters.)

- A. push

Correct Answer: A
