QUESTION 1

Where are the listening ports defined that allow Avaya Aura Session Manager to listen for SIP traffic?

- A. Communication Profile
- B. SM Firewall
- C. SM Administration
- D. Session Manager SIP Entity

Correct Answer: D

QUESTION 2

What is the Avaya supported method of backing up an Avaya Aura Session Manager (SM) database?

- A. Perform the backup from an Avaya Aura System Manager.
- B. Connect a Memory Drive into the SM Server with an automatic Backup-making script.
- C. Access the SM Command Line Interface (CLI) and perform a Backup manually.
- D. Wait for the overnight Backup process to send you a copy of the .tar file automatically.

Correct Answer: A

Chapter 13: Managing system data

Backup and Restore

The backup and restore functions run on System Manager.

System Manager creates one backup file that contains all the data for the entire system. You do not need to create individual backup files of all the Session Manager instances. The data and configuration files for the entire system are stored centrally on System Manager.

System Manager supports local backup and remote backup. You can transfer backup files by using the sftp or scp protocol.

You can perform either a backup or a restore operation at a specified time. The restore operation fails if a backup operation is in progress. When a restore operation is in progress, the system ignores all backup jobs that are scheduled at that time. System Manager displays a warning if you attempt to restore a corrupted or tampered backup file.

QUESTION 3

When adding an H.323 Station, which three fields must be administered? (Choose three.)

- A. Extension
- B. Port
- C. Set Template/Set Type
- D. Security Code
- E. Class of Service (COS)

Correct Answer: ACD

QUESTION 4

What are two functions of Avaya Aura Session Manager (SM)? (Choose two.)

- A. It acts as an H.323 call controller.
- B. It provides a point of registration for SIP endpoints.
- C. It acts as a centralized SIP routing and integration tool.
- D. It acts as an H.323 routing engine.

E. It registers digital (DCP).

Correct Answer: BC

QUESTION 5

Which three configuration points are necessary before you can build a Network Routing Policy? (Choose three.)

- A. Location
- B. User Profile
- C. Avaya Aura Communication Manager (CM) Profile
- D. Domain
- E. SIP Entity

Correct Answer: ADE
