QUESTION 1

If more than one Avaya BreezeTM node is available in the cluster, which statement about redundancy and load-balancing is true?

A. IM clients point to any Avaya BreezeTM node SM100 IP address. The client is dynamically informed of alternate Avaya BreezeTM nodes in the cluster.

B. The list of all Avaya BreezeTM nodes SM100 IP addresses must be configured in the client.

C. The Cluster IP address is not used for Presence Services in 7.0. IM clients configure a FQDN instead of IP address which is resolved by a DNS server to all Avaya BreezeTM nodes in the cluster.

D. IM clients point to the Leader Avaya BreezeTM node SM100 IP address which redirects the clients to a particular Avaya BreezeTM node based on load-balancing policy.

Correct Answer: D

Enable load balancing for a cluster if you want to scale the HTTP services without targeting a particular Avaya BreezeTM server. All the requests are sent to the cluster IP address. When you enable load balancing, two Avaya BreezeTM servers are chosen as the active and standby load balancing servers. The active load balancer distributes the HTTP requests to all the other servers in the cluster in a round robin fashion. QUESTION 2

How many Server Flows and/or Subscriber Flows are required for SIP Trunking?

A. one Subscriber Flow and two Server Flows

B. a minimum of two Subscriber Flows

C. one Subscriber Flow and one Server Flow

D. a minimum of two Server Flows

Correct Answer: A

Two types of flows need to be defined for the proper routing of SIP messages from and to the endpoints

and the SIP server.

Example, Server Flows:

QUESTION 3

In which location is the AAMS URI `ce-msml@avaya.com\\' configured?

A. Elements > Breeze > Configuration > HTTP Security and as a Regular Expression

B. Elements > Breeze > Configuration > HTTP Security and as a Dial Pattern

C. Home > Elements > Breeze > Configuration > Avaya Aura Media Server and as a Dial Pattern

D. Home > Elements > Breeze > Configuration > Avaya Aura Media Server and as a Regular Expression

Correct Answer: D

Creating the Avaya Aura Media Server Routing Pattern Procedure

1.

On System Manager, click Elements > Routing > Routing Policies.

2.

Click New.

3.

Type a Name for the Routing Policy.

4.

From the SIP Entity as Destination field, click Select.

5.

Select the Avaya Aura

Media Server SIP Entity that you created.

Select the Local Host Name FQDN SIP Entity if you are using High Availability for the Avaya Aura Media

Server routing.

6.

Click Commit.

7.

Navigate to Home > Elements > Routing > Regular Expressions and click New.

8.

In the Pattern field, type ce-msml@.* This sip-domain value must match:

?The SIP domain that you entered in the Home>; Elements>; Routing>; Domains page. ?The default SIP

domain that you entered on the Avaya BreezeTM Cluster Administration page.

9.

Click Commit https://downloads.avaya.com/css/P8/documents/101014426 References: Deploying Avaya Breeze, Release 3.1, (September 2016), page 55

QUESTION 4

Which statement about the SIP Entities to support Avaya Aura Presence Services is true?

A. Only one SIP Entity is built of Type = "Presence Services", which uses the SM100 IP address of the Avaya BreezeTM node.

B. Only one SIP Entity is built of Type = "Engagement Development Platform", which uses the SM100 IP Address of the Avaya BreezeTM node.

C. Two SIP Entities are built to the same SM100 IP address of each node. One is of Type = "Engagement Development Platform", and the other is of Type = "Other".

D. Two SIP Entities are built to the same SM100 IP address of each node. One is of Type = "Engagement Development Platform", and the other is of Type = "Presence Services".

Correct Answer: B

QUESTION 5

When planning the Avaya Session Border Controller for Enterprise (SBCE) for SIP Trunking, what is a good practice to adopt?

A. Name Interfaces consistently, for example, A1 for Internal network to Call Server and B1 for external to Trunk Server.

B. Name all internal and external interfaces exactly the same.

C. Use the same IP address on both, internal and external sides of the network.

D. Use one Avaya Session Border Controller for Enterprise on the internal and external sides of the network.

Correct Answer: A

Use the same interface mapping throughout! Examples in this section use:
