Following Questions and Answers are all new published by Microsoft Official Exam Center

QUESTION 1

You have several reference computers. The computers are configured to always start from a local hard disk drive.

You plan to capture the reference computers.

On each reference computer, you connect a USB flash drive (UFD) that contains an installation of Windows Preinstallation Environment (Windows PE).

You need to ensure that the reference computers start automatically by using Windows PE from the UFD.

What should you do?

A. From the System Configuration utility, modify the Boot settings.

B. Run bdcedit.exe and modify the boot configuration data (BCD) store.

C. From the BIOS options, modify the startup order.

D. From the System Properties, modify the Startup and Recovery settings.

Correct Answer: C

QUESTION 2

You have a server named Server1. Server1 is the member of a workgroup.

On Server1, you create a local user account named User1, as shown in the following exhibit. (Click the Exhibit button.)

On Server1, you create a share named Share1. You assign User1 Full control permissions to Share1. You copy the source files for Windows 8 to Share1.

When attempting to access Share1 from Windows Preinstallation Environment (Windows PE), User1 receives an error message.

You need to ensure that User1 can access Share1 from Windows PE.

What should you do?

A. From Server1, modify the Advanced Sharing properties.

B. Clear the Password never expires check box for the user account of User1.

C. Add a password to the user account of User1.

D. From Server1, modify the Advanced settings in System Properties.

Correct Answer: C

QUESTION 3

You have a server named Server1 that runs Windows Server 2012.

You plan to install the Windows Deployment Services server role on Server1 to deploy images to the client computers of your customers.

You need to identify what must be deployed to the network before you can deploy images by us- ing Windows Deployment Services (WDS).

What should you identify?

A. the Microsoft Deployment Toolkit (MDT)

B. a domain controller

C. the Windows Assessment and Deployment Kit (Windows ADK)

D. a DHCP server

Correct Answer: D

QUESTION 4

You have several servers that have the following hardware installed:

A network card

2 GB of physical memory

A 100-GB hard disk drive

A x86 processor and mother board

You plan to install Windows Server 2012 on the servers.

You need to identify which hardware component must be replaced before the planned installa- tion.

Which hardware component should you identify?

A.

The x86 processor and mother board

B.

The network card

C.

The 2 GB of physical memory

D.

The 100-GB hard disk drive

Correct Answer: A

QUESTION 5

You plan to capture a Windows 8 reference installation. The reference installation contains sev- eral third-party drivers for USB devices.

You need to ensure that the third-party device drivers are preserved in the captured Windows im- age.

Which component should you configure in the answer file?

A. Microsoft-Windows-PnpCustomizationsNonWinPE

B. Microsoft-Windows-Setup

C. Microsoft-Windows-Deployment

D. Microsoft-Windows-PnpSysprep

Correct Answer: A
