QUESTION 1

You start a client computer by using Pre-Boot Execution Environment (PXE). You load a default version of Windows Preinstallation Environment (Windows PE) that was created by using the Windows Assessment and Deployment Kit

(Windows ADK).

You have a file server that contains a shared folder. The folder contains an image of Windows 8.

The folder is shared to the local Users group only.

The computer has a system partition and a Windows partition.

You need to apply a reference installation from a network share.

Which command should you run before applying the image?

A. drvinst.exe

B. wpeinit.exe

C. mshta.exe

D. net.exe

Correct Answer: B

QUESTION 2

You deploy a Windows 8 image to a reference computer.

You sign in to the reference computer by using the built-in administrator account and you mod- ify the user environment.

You need to deploy the image to several client computers. The image must contain the profile of the built-in administrator account as the default user profile.

Which two actions should you perform before you capture the image? (Each correct answer presents part of the solution. Choose two.)

A. Create an answer file that contains the Microsoft-Windows-Shell-Setup settings.

B. Run dism.exe /image.

C. Run sysprep.exe /generalize /mode:vm.

D. Run dism.exe /apply-unattend:unattend.xml.

E. Create an answer file that contains the Microsoft-Windows-Setup\UserData settings.

F. Run sysprep.exe /audit /unattend:unattend.xml.

G. Run sysprep.exe /generalize/unattend:unattend.xml.

Correct Answer: EG

QUESTION 3

You plan to install operating systems on 500 client computers by using the sources files located in a network share.

You need to identify which operating system must be installed on the computer that hosts the share.

The solution must ensure that 25 computers can connect concurrently to the share.

Which two possible operating systems achieve this goal? (Each correct answer presents a com- plete solution. Choose two.)

A. Windows 7 Professional

B. Windows 8 Enterprise

C. Windows Server 2012 Standard

D. Windows 7 Ultimate

E. Windows Server 2008 R2 Standard

Correct Answer: CE

QUESTION 4

Which statement correctly describes the functionality of the Windows 8 version of Reagentc?

A. Reagentc can be used to service an online image and an offline image.

B. Reagentc can be used to service an online image only.

C. Reagentc can be used to service an offline image only.

D. Reagentc can be used from Windows Preinstallation Environment (Windows PE) only.

Correct Answer: A

QUESTION 5

You have a server named Server1 that runs Windows Server 2012 and has the Windows Deploy- ment Services server role installed.

You need to use a capture image to create an image of a reference computer.

What should you add to Server1 before creating the capture image?

A. A boot image

B. An answer file

C. An install image

D. A configuration set

Correct Answer: A
