### QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

To improve performance, a SQL SELECT statement should use indexes.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. No change is needed
- B. joins
- C. grouping
- D. ordering

Correct Answer: A

---

### QUESTION 2

You have a server that limits the number of data connections. What should you use to optimize connectivity when the number of users exceeds the number of available connections?

- A. Connection timeouts
- B. Named pipes
- C. Normalization
- D. Connection pooling

Correct Answer: D

In software engineering, a connection pool is a cache of database connections maintained so that the connections can be reused when future requests to the database are required.

---

### QUESTION 3

You create an application that uses Simple Object Access Protocol (SOAP).

Which technology provides information about the application's functionality to other applications?

- A. Web Service Description Language (WSDL)
- B. Extensible Application Markup Language (XAML)
- C. Common Intermediate Language (CIL)
- D. Universal Description, Discovery, and Integration (UDDI)

---

Correct Answer: A

WSDL is often used in combination with SOAP and an XML Schema to provide Web services over the Internet. A client program connecting to a Web service can read the WSDL file to determine what operations are available on the server. Any special datatypes used are embedded in the WSDL file in the form of XML Schema. The client can then use SOAP to actually call one of the operations listed in the WSDL file using for example XML over HTTP.

---

#### QUESTION 4

You execute the following code.

```
Dim beakerFull As Boolean = True
Dim flameOn As Boolean = False
Dim iResult As Integer = 0

If beakerFull = True Then
    If flameOn = True Then
        iResult = 1
    Else
        iResult = 2
    End If
Else
    iResult = 3
End If
```

What will the variable result be?

- A. 0
- B. 1
- C. 2
- D. 3

Correct Answer: C

---

#### QUESTION 5

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

**Answer Area**

Description of Behavior	Yes	No
The "is a" relationship between classes refers to composition.	<input type="checkbox"/>	<input type="checkbox"/>
The "has a" relationship between classes refers to inheritance.	<input type="checkbox"/>	<input type="checkbox"/>
Both composition and inheritance allow you to create sub-objects.	<input type="checkbox"/>	<input type="checkbox"/>

Hot Area:

**Answer Area**

Description of Behavior	Yes	No
The "is a" relationship between classes refers to composition.	<input type="checkbox"/>	<input type="checkbox"/>
The "has a" relationship between classes refers to inheritance.	<input type="checkbox"/>	<input type="checkbox"/>
Both composition and inheritance allow you to create sub-objects.	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

## Answer Area

Description of Behavior	Yes	No
The "is a" relationship between classes refers to composition.	<input type="radio"/>	<input checked="" type="radio"/>
The "has a" relationship between classes refers to inheritance.	<input type="radio"/>	<input checked="" type="radio"/>
Both composition and inheritance allow you to create sub-objects.	<input checked="" type="radio"/>	<input type="radio"/>
