QUESTION 1

You are preparing to deploy a Windows Forms application.

You need to display a Web page when the installation is complete.

What should you do?

- A. Create a Deployment project and a Custom Action.
- B. Create a Web Setup project.
- C. Add the Web address to the Completion Form.
- D. Add a Browser object to the Deployment project.
- E. Create a CAB project and a Custom Action.

Correct Answer: A

QUESTION 2

You create a blank Windows form and add a ComboBox control to it. You set the KeyPreview property of the form to true. You attach a KeyDown event handler to the form, and you attach another KeyDown event handler to the combo box. What will happen when a user presses a key while the ComboBox control has the focus?

- A. The form will handle the event first.
- B. The event handlers will fire simultaneously.
- C. The ComboBox control will handle the event first.
- D. The event handlers will fire in an indeterminate order.

Correct Answer: A

QUESTION 3

To ensure that a Windows Service application starts on its own, you should set the StartType property of the ServiceInstaller to:

- A. Startup.
- B. Enabled.
- C. OnBoot.
- D. Automatic.

Correct Answer: A

QUESTION 4

A Windows form contains two buttons. When the buttons are clicked, both buttons must execute CodeBlockA. You need to ensure that you can add new buttons to the form that will execute CodeBlockA when they are clicked. What should you do?

- A. Create an interface that all buttons implement.
- B. Create the new buttons by using Copy and Paste in the form designer.
- C. Create a base class that all buttons inherit from.
- D. Create a shared Click event handler for all buttons.

Correct Answer: D

QUESTION 5

Which type of Visual Studio project should you use to create an installer for a Windows application?

- A. Setup project
- B. Merge Module project
- C. Cab project
- D. Console project

Correct Answer: A
