QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

A key defines the amount of storage space that is allocated to a value in a column.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct

- A. No change is needed
- B. format
- C. data type
- D. validator

Correct Answer: C

QUESTION 2

A database contains two tables named Customer and Order.

You execute the following statement:

```
DELETE FROM Order
```

```
WHERE CustomerID = 209
```

What is the result?

- A. The first order for CustomerID 209 is deleted from the Order table.
- B. All orders for CustomerID 209 are deleted from the Order table, and CustomerID 209 is deleted from the Customer table.
- C. All orders for CustomerID 209 are deleted from the Order table.
- D. CustomerID 209 is deleted from the Customer table.

Correct Answer: C

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

A relational database management system employs the concept of an attribute to ensure that data entered into a field in a column is valid.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. a primary key
- C. a constraint
- D. an index

Correct Answer: C

QUESTION 4

A view can be used to:

- A. Save an extra copy of data stored in a separate table.
- B. Limit access to specific rows or columns of data in a table.
- C. Ensure referential integrity.
- D. Save historical data before deleting it from the base table.

Correct Answer: B

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

Use indexing to create, remove, or change database objects.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. Data manipulation language (DML) statements
- C. Data definition language (DDL) statements
- D. A unique constraint

Correct Answer: C
