#### **QUESTION 1**

You have a table of products with fields for ProductID, Name, and Price.

You need to write an UPDATE statement that sets the value in the InStock field to Yes for a specific ProductID.

Which clause should you use in your update statement?

- A. THAT
- B. WHERE
- C. GROUP BY
- D. HAVING

Correct Answer: B

#### **QUESTION 2**

#### **HOTSPOT**

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

#### **Answer Area**

Description of Behavior	Yes	No
A clustered index sorts and stores the data columns of a table or view in order, based on the clustered index key.	0	0
A non-clustered index is defined on a table or view by using a clustered index or heap.	0	0
A unique index ensures that the index key contains no duplicate values and that every row in the table or view is unique.	0	0
A filtered index is a clustered index that is optimized for queries that select a small percentage of rows from a table.	0	0

Correct Answer:

#### Answer Area

Description of Behavior	Yes	No
A clustered index sorts and stores the data columns of a table or view in order, based on the clustered index key.	0	0
A non-clustered index is defined on a table or view by using a clustered index or heap.	0	0
A unique index ensures that the index key contains no duplicate values and that every row in the table or view is unique.	0	0
A filtered index is a clustered index that is optimized for queries that select a small percentage of rows from a table.	0	0

#### **QUESTION 3**

This question requires that you evaluate the underlined text to determine if it is correct.

A key defines the amount of storage space that is allocated to a value in a column.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct

- A. No change is needed
- B. format
- C. data type
- D. validator

Correct Answer: C

#### **QUESTION 4**

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

#### Answer Area

Statement	Yes	No
The VARCHAR data type contains only numeric characters.	0	0
The NUMERIC data type contains only numbers that have decimal places.	0	0
The INT data type contains only whole numbers.	0	0
Correct Answer:		
Answer Area		
Statement	Yes	No
The VARCHAR data type contains only numeric characters.	0	0
The NUMERIC data type contains only numbers that have decimal places.	0	0
The INT data type contains only whole numbers.	0	0

#### **QUESTION 5**

One reason to add an index is to:

- A. Decrease storage space.
- B. Increase database security.
- C. Improve performance of select statements.
- D. Improve performance of insert statements.

Correct Answer: C
