### QUESTION 1

Which of the following statements are NOT true about the Volume Boot Sector, commonly known as Master Boot Record? Each correct answer represents a complete solution. (Choose two.)

- A. The actual program can be 512 bytes long.
- B. Four 16-byte master partition records are present in MBR.
- C. The end of MBR marker is h55CC.
- D. The volume boot sector is present in cylinder 0, head 0, and sector 1 of the default boot drive.

Correct Answer: AC

The actual program can only be 444 bytes long. The end of MBR marker is h55AA.

Incorrect Answers:

B, D: All these statements are true about MBR.

---

### QUESTION 2

You create a new domain.

Which two Active Directory objects will be available by default? (Choose two.)

- A. Computer
- B. Employee
- C. User
- D. Device
- E. Server

Correct Answer: AC

An Active Directory structure is an arrangement of information about objects. The objects fall into two broad categories: resources (e.g., printers) and security principals (user or computer accounts and groups). Security principals are

assigned unique security identifiers (SIDs).

Note:

Install-ADDSDomain installs a new Active Directory domain configuration.

---

### QUESTION 3

HOTSPOT

Your network is configured as an Active Directory Domain Services domain. You have two domain controllers running Windows Server 2016.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

	Yes	No
Active Directory groups can be used to assign permissions on a shared folder on a member server.	<input type="radio"/>	<input type="radio"/>
Active Directory groups can be linked to Active Directory group policies.	<input type="radio"/>	<input type="radio"/>
Local groups on a member server can be members of global groups in a domain.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

**Answer Area**

	Yes	No
Active Directory groups can be used to assign permissions on a shared folder on a member server.	<input checked="" type="radio"/>	<input type="radio"/>
Active Directory groups can be linked to Active Directory group policies.	<input checked="" type="radio"/>	<input type="radio"/>
Local groups on a member server can be members of global groups in a domain.	<input type="radio"/>	<input checked="" type="radio"/>

There are three different types of Active Directory domain groups (which does not include local groups): Universal, Global, Domain Local

**QUESTION 4**

What service replicates information of every object in a tree and forest so that you can quickly find those objects?

- A. LDAP server
- B. global catalog
- C. Infrastructure Master
- D. PDC Emulator

Correct Answer: B

A global catalog replicates the information of every object in a tree and forest. However, rather than store the entire object, it stores just those attributes that are most frequently used in search operations, such as a user's first and last name, computer name, and so forth. By default, a global catalog is created automatically on the first domain controller in the forest, but any domain controller can be made into a global catalog.

---

#### QUESTION 5

Which technology uses digital certificates for secure communications over the Internet?

- A. Fully Qualified Domain Name (FQDN)
- B. Internet Service Manager (ISM)
- C. Secure Sockets Layer (SSL)
- D. File Transfer Protocol (FTP)

Correct Answer: C
