QUESTION 1

You are deploying a virtual machine (VM) on a computer running Windows Server 2016 that is configured as a Hyper-V host. The VM will be used to test a new application. You will be testing various configurations.

You need to provide storage that can expand in size automatically to provide more storage as necessary, but without making changes to the initial VHD.

Which type of VHD should you use?

- A. differencing
- B. linked
- C. fixed
- D. dynamic

Correct Answer: A

QUESTION 2

By default, which group can create and link Group Policy Objects?

- A. Authenticated Users
- B. Domain Users
- C. Domain Administrators
- D. Local Administrators

Correct Answer: C

The Domain Administrators are the only people who can create GPOs by default.

QUESTION 3

Which of the following statements best describe the functions of RD Connection Broker in network infrastructure? Each correct answer represents a complete solution. (Choose two.)

- A. It is used to permit a user to reconnect to his existing session in a load-balanced RD Session Host server farm.
- B. It is used to integrate with Hyper-V to provide virtual machines by using RemoteApp and Desktop Connection.
- C. It is used to redirect users to a shared virtual machine pool where a virtual machine is dynamically assigned.
- D. It is used to enable a user to evenly distribute the session load among RD Session Host servers in a load-balanced RD Session Host server farm.

Correct Answer: AD

The various functions of RD Connection Broker are as follows:

It is used to permit a user to reconnect to his existing session in a load-balanced RD Session Host server farm.

It is used to enable a user to evenly distribute the session load among RD Session Host servers in a load-balanced RD Session Host server farm.

It is used to provide users access to virtual desktops that are hosted on RD Virtualization Host servers and to RemoteApp programs that are hosted on RD Session Host servers using RemoteApp and Desktop Connection.

Incorrect Answers:

B, C: Both of these are the functions of RD Virtualization Host.

QUESTION 4

What is the minimum Windows Server version on which Hyper-V can be installed?

- A. 2016 64-bit
- B. 2012 64-bit
- C. 2008 32-bit
- D. 2008 64-bit

Correct Answer: D

Hyper-V, formerly known as Windows Server Virtualization, is a native hypervisor that enables platform virtualization on x86-64 systems. A beta version of Hyper-V was shipped with certain x86-64 editions of Windows Server 2008, and a finalized version (automatically updated through Windows Update) was released on June 26, 2008.

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

The minimum permission needed to delete other users\' documents from a print queue is "Print".

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. Manage Documents
- B. Manage Printers
- C. Deny
- D. No change is needed

Correct Answer: A

Manage documents. If you have this permission, you can manage all jobs for a printer that are waiting in the print queue, including documents or files that are being printed by other users. Incorrect Answers:

D: With print permissions you can only delete your own documents.
