QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct. IPv4 multicast addresses range from "192.168.0.0 to 192.168.255.255".

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. 127.0.0.0 to 127.255.255.255
- B. 172.16.0.0 to 172.31.255.255
- C. 224.0.0.0 to 239.255.255.255
- D. No change is needed

Correct Answer: C

Class D is multicast.

Class A: 0.0.0.0 - 127.255.255.255 Class B: 128.0.0.0 - 191.255.255.255 Class C: 192.0.0.0 - 223.255.255.255 Class D: 224.0.0.0 - 239.255.255.255

QUESTION 2

One purpose of a perimeter network is to:

- A. Make resources available to the intranet.
- B. Link campus area networks (CANs).
- C. Link local area networks (LANs).
- D. Make resources available to the Internet.

Correct Answer: D

In computer security, a DMZ or demilitarized zone (sometimes referred to as a perimeter network) is a physical or logical subnetwork that contains and exposes an organization's external-facing services to a larger and untrusted network, usually the Internet. The purpose of a DMZ is to add an additional layer of security to an organization's local area network (LAN); an external network node only has direct access to equipment in the DMZ, rather than any other part of the network.

QUESTION 3

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

Answer Area

Yes No

IPsec can be used to secure network communications between two machines.

IPsec can be used to secure network communication between two networks.

IPsec network traffic is always encrypted.

Correct Answer:

Answer Area

Yes No

IPsec can be used to secure network communications between two machines.

IPsec can be used to secure network communication between two networks.

IPsec network traffic is always encrypted.

QUESTION 4

What is the primary purpose of a perimeter network?

- A. to act as a hidden location to deploy network clients
- B. to act as a secure location for deploying highly sensitive network servers
- C. to provide a buffer area between a private intranet and the public Internet
- D. to monitor traffic between routed subnets in a private LAN

Correct Answer: C

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

"A virtual private network (VPN)" protects a network's perimeter by monitoring traffic as it enters and leaves.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. Extranet
- B. Firewall
- C. Intranet
- D. No change is needed

Correct Answer: B

A firewall is software or hardware that checks information coming from the Internet or a network, and then either blocks it or allows it to pass through to your computer, depending on your firewall settings.
