QUESTION 1

Your company is deploying a new application on employee's personal Windows RT devices. The devices are registered with Microsoft Intune. You need to publish the new application to Microsoft Intune cloud storage so that the employees

can install the published application.

What are requirements of the published installation files?

- A. In order to publish the files, Internet speed must be at least 50 kbps
- B. The cumulative total file size for the published applications must be smaller than 2 GB
- C. In order to upload the software, the files must be a .zip format
- D. As many files as necessary may be uploaded, but no single file may be larger than 2 GB

Correct Answer: D

Before you publish computer apps to Microsoft Intune cloud storage make sure no single file size is larger than 2 GB.

QUESTION 2

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

Answer Area	Yes	No
SSL can be used to secure network connections to websites	<input type="radio"/>	<input type="radio"/>
You can use SSL for both encryption and authentication	<input type="radio"/>	<input type="radio"/>
SSL requires both the client and server to have certificates	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area	Yes	No
SSL can be used to secure network connections to websites	<input checked="" type="radio"/>	<input type="radio"/>
You can use SSL for both encryption and authentication	<input type="radio"/>	<input checked="" type="radio"/>
SSL requires both the client and server to have certificates	<input type="radio"/>	<input checked="" type="radio"/>

*

Secure Sockets Layer (SSL) is a cryptographic protocol designed to provide communications security over a computer network, such as secure connections to websites.

*

SSL is used for encryption but not for authentication.

*

There is SSL for the web server, but the client does not have a SSL certificate.

SSL Certificates are small data files that digitally bind a cryptographic key to an organization's details.

When installed on a web server, it activates the padlock and the https protocol (over port 443) and allows secure connections from a web server to a browser.

QUESTION 3

Which type of information about users does biometrics evaluate?

- A. phrases a user has memorized
- B. where a user is located
- C. physical characteristics of a user
- D. objects a user carries with him or her

Correct Answer: C

Biometrics refers to authentication techniques that rely on measurable physical characteristics that can be automatically checked.

Note: There are several types of biometric identification schemes: face: the analysis of facial characteristics fingerprint: the analysis of an individual's unique fingerprints hand geometry: the analysis of the shape of the hand and the length of the fingers retina: the analysis of the capillary vessels located at the back of the eye iris: the analysis of the colored ring that surrounds the eye's pupil signature: the analysis of the way a person signs his name. vein: the analysis of pattern of veins in the back of the hand and the wrist voice: the analysis of the tone, pitch, cadence and frequency of a person's voice.

QUESTION 4

Match each type of malware to its definition.

To answer, drag the appropriate malware type from the column on the left to the definition on the right. Each malware type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Malware type	Answer Area
Virus	tracks a user's computer usage
Spyware	sends copies of itself to other machines
Worm	spreads when an executable is initiated by a user

Correct Answer:

Malware type	Answer Area
	tracks a user's computer usage Spyware
	sends copies of itself to other machines Worm
	spreads when an executable is initiated by a user Virus
