QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

You manage Windows 8.1 desktop and laptop computers in your university\\'s computer lab.

The university\\'s IT team recently implemented an active directory environment.

You need to join the desktop and laptop computers to a new Active Directory domain.

You should use the "Network and Internet" Control Panel applet to achieve this goal.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. User Accounts
- C. Administrative Tools
- D. System

Correct Answer: D

Join a domain, workgroup, or homegroup

1.

Open System by swiping in from the right edge of the screen, tapping Search (or if you\\'re using a mouse, pointing to the upper-right corner of the screen, moving the mouse pointer down, and then clicking Search), entering System in the search box, and tapping or clicking System.

2.

Under Computer name, domain, and workgroup settings, click Change settings. You might be asked for an admin password or to confirm your choice.

3.

Click Network ID and follow the steps on your screen.

QUESTION 2

Your company wants to implement file and document security for domain member clients and registered bring your own device (BYOD) devices. Administrators should be able to apply permissions based on well-defined rules, including the automatic classification of files. Policies need to be distributed through group policy.

The solution should include auditing to support forensic analysis.

What should you use?

- A. Software Restriction Policies
- B. Active Directory Federated Services
- C. Dynamic Access Control
- D. Azure Rights Management

Correct Answer: C

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

The "ExFAT" file system can automatically verify and auto correct data to avoid file system errors.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

- A. No change is needed
- B. NTFS
- C. FAT32
- D. ReFS

Correct Answer: D

Resilient File System (ReFS) is a Microsoft proprietary file system introduced with Windows Server 2012 with the intent of becoming the "next generation" file system after NTFS. ReFS key design advantages are intended to include automatic

integrity checking and data scrubbing, removing the need for chkdsk and protecting against data degradation.

Incorrect answers:

Not A: exFAT (Extended File Allocation Table) is a Microsoft file system optimized for flash drives. exFAT can be used where the NTFS file system is not a feasible solution (due to data structure overhead), or where the file size limit of the standard FAT32 file system is unacceptable.

QUESTION 4

Your university\\s IT department currently has no Active Directory strategy.

The university needs a solution that allows you to manage users and groups to secure access to Microsoft online services such as Microsoft Office 365.

Which Active Directory strategy should the university use?

- A. Active Directory Federation services
- B. Active Directory Lightweight Directory services
- C. Active Directory Certificate services
- D. Azure Active Directory

Correct Answer: D

Azure Active Directory is preintegrated with Salesforce.com, Office 365, Box and many more.

QUESTION 5

You are trying to access a file in a folder that is located on a Windows 10 computer. You are accessing the file over the network from a second computer. You have the following permissions:

NTFS: Full Control

Share: Read Only

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
You will be able to read the file	<input type="radio"/>	<input type="radio"/>
You will be able to delete the file	<input type="radio"/>	<input type="radio"/>
You will be able to change the file	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
You will be able to read the file	<input checked="" type="radio"/>	<input type="radio"/>
You will be able to delete the file	<input type="radio"/>	<input checked="" type="radio"/>
You will be able to change the file	<input type="radio"/>	<input checked="" type="radio"/>
