QUESTION 1

You manage 200 desktop computers at your school's main computer lab. The computers run Microsoft Windows 10.

A critical update was released.

You need to determine if the update was installed on one of the computers in the lab. What should you do?

- A. View the Event Viewer Security log
- B. Check System Status in Control Panel
- C. View Windows update history
- D. Go to the System Action Center

Correct Answer: C

Follow these steps to see which Windows updates are installed on your computer.

1.

Open Windows Update by clicking the Start button Picture of the Start button. In the search box, type Update, and then, in the list of results, click Windows Update.

2.

In the left pane, click View update history.

QUESTION 2

This question requires that you evaluate the underlined text to determine if it is correct.

You are personalizing the Start screen on a Windows 10 computer.

To create a new group of tiles on the Start Screen, select a tile and press F12.

Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. access Settings > Personalize > Start
- C. right-click a tile and close Add to new group
- D. drag a tile to the far-right side of the Start screen and drop it

Correct Answer: D

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

Windows Server Active Directory enables single sign-on without the need for additional services, which simplifies user access to thousands of cloud applications on Windows, Mac, and iOS devices.

Review the underlined text, if it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. Microsoft Account
- C. Active Directory Federation Services
- D. Azure Active Directory

Correct Answer: D

Azure Active Directory is a comprehensive identity and access management cloud solution that provides a robust set of capabilities to manage users and groups. Azure Active Directory enables single sign-on to simplify user access to thousands of cloud applications from Windows, Mac, Android and iOS devices.

QUESTION 4

This question requires that you evaluate the underlined text to determine if it is correct.

Redundant Microsoft Azure applications are able to meet increased demand with consistent results in acceptable time windows.

Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. Highly Available
- C. Fault Tolerant
- D. Scalable

Correct Answer: D

Scalable applications are able to meet increased demand with consistent results in acceptable time windows.

When a system is scalable, it scales horizontally or vertically to manage increases in load while maintaining consistent performance. In basic terms, horizontal scaling adds more machines of the same size (processor, memory, bandwidth)

while vertical scaling increases the size of the existing machines.

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

"The Windows Store" allows users of Windows 8 and Windows 8.1 computers to view and install applications that the users\ administrators make available to them. The computers must be attached to the domain, and the user must be logged

in with domain credentials.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

- A. No change is needed
- B. Microsoft SharePoint
- C. The Microsoft Intune Company Portal App
- D. The System Center Configuration Manager Company Portal App

Correct Answer: D

The System Center Configuration Manager Company Portal app allows users of Windows 8, Windows 8.1 and Windows 10 machines to view and install applications made available to the user by their administrators. The machine must be managed by Microsoft System Center 2012 R2 Configuration Manager, or later, with the agent installed.

End User Machines requirements:

*

Windows 8 Pro, Windows 8 Enterprise, Windows 8.1 Pro, Windows 8.1 Enterprise, Windows 10 Pro or Windows 10 Enterprise

*

Machine must be domain-joined

*

User must be logged on with domain credentials

*

System Center 2012 R2 Configuration Manager (or later) client agent must be installed
