QUESTION 3

You are a network administrator for a company that uses Skype for Business.

You need to ensure that users can access conferencing from mobile phones even if the phones do not support the Skype for Business mobile client. What should you set up?

A. multi-party audio and video

B. Web Conferencing tools

C. Skype consumer client

D. dial-in conferencing

Correct Answer: D

QUESTION 4

You recently set up Microsoft Intune for your company.

You need to assign a user a tenant role so that the user can reset certain password. You need to achieve this goal without giving the user the ability to change global administrator passwords.

Which two admin roles fulfill this requirement? (Choose two.)

A. user management administrator

B. service support administrator

C. billing administrator

D. global administrator

Correct Answer: AB

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

Cloud Infrastructure as a Service (IaaS) allows the consumer to deploy consumer-acquired applications that are created by using programming languages and tools that the provider supports.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

A. Backend as a Service (BaaS)

B. No change is needed.

C. Platform as a Service (PaaS)

D. Software as a Service (Saas)

Correct Answer: C
