QUESTION 1

Your friend Erin created the following algorithm:

```
FOR EACH Word in Sentence
  IF Word is in Dictionary
    Symbol = Get Symbol for Word from Dictionary
  ELSE
    Create new Symbol for Word
    Add Symbol and Word to Dictionary
  END IF
  OUTPUT Symbol
NEXT
```

You apply the algorithm to the following sentence:

The treasure chest contains 100 pieces of gold, 50 pieces of silver, and a handful of rubies.

What are the two outcomes? (Choose two.)

- A. The symbol for "of" will be output once.
- B. The word "of" will appear in the dictionary once.
- C. The symbol for "of" will be output three times.
- D. The word "of" will appear in the dictionary three times.

Correct Answer: BC

QUESTION 2

You are creating a Touch Develop app.

Which library would you use to access each function? To answer, drag the appropriate library from the column on the left to the function on the right. Each library may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Select and Place:

Libraries

| |
|-------|
| forms |
| wall |
| box |

Answer Area

| |
|-----------------|
| ask string |
| input text area |
| set font size |

Correct Answer:

Libraries

| |
|--|
| |
| |
| |

Answer Area

| |
|-------|
| wall |
| box |
| forms |

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

Sunny, Rainy, and Cloudy control the weather of a magic kingdom.

Citizens of the kingdom are not happy with their service because the weather changes too rapidly. To make the citizens happy, Sunny, Rainy, and Cloudy agree that only one of them will control the weather at a time. To determine who

controls the weather next, they design a game to solve the problem.

Sunny, Rainy, and Cloudy play the game every few hours. Because Sunny is the youngest of the three. Rainy always lets Sunny move first. The winner gets the right to control the weather. If there is no winner between Sunny and Rainy,

Cloudy controls the weather. The game play for all three conditions is shown in the exhibits. (Click the Sunny wins tab, the Rainy wins tab and the Neither wins tab to view the exhibits.)

You create the following algorithm to define the game play:

```
REPEAT UNTIL someone controls the weather
  Sunny makes a move.
  Rainy makes a move.
  IF Sunny has a winning line THEN
    Sunny controls the weather.
  END IF
  IF Rainy has a winning line THEN
    Rainy controls the weather.
  END IF
  If the board is full THEN
    Cloudy controls the weather.
  END IF
END REPEAT
```

This algorithm will produce the correct result.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. will cause an endless loop.
- C. might give Rainy control of the weather when Sunny wins.
- D. might give Sunny control of the weather when Rainy wins.

Correct Answer: A

QUESTION 4

You are creating a drawing app that uses the Touch Develop turtle object. You have written the code to draw a blue square and change the pen color to red. The turtle is positioned at the top left corner of the square, facing north. You need to draw the red lines shown in the following graphic.

Which four code segments should you use? To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.

Select and Place:

Code Segments

Answer Area (move 4 code segments)

- △ turtle → right turn(30)
- △ turtle → left turn(45)
- △ turtle → forward(100)
- △ turtle → right turn(60)
- △ turtle → left turn(120)
- △ turtle → back(100)

Correct Answer:

Code Segments

Answer Area (move 4 code segments)

- △ turtle → left turn(45)
- △ turtle → forward(100)
- △ turtle → left turn(120)
- △ turtle → back(100)

- △ turtle → right turn(30)
- △ turtle → right turn(60)

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

You are writing an app for Best For You Organics Company.

The app needs to allow the user to convert a recipe from cups to liters. The app will use the conversion ratio of 1 cup is equal to 0.2366 liters.

You define the pseudocode as follows:

INPUT cups

liters = cups * 0.2366

OUTPUT liters

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. cups * 2.366
- C. cups / 0.2366
- D. cups / .02366 * 10

Correct Answer: A
