**QUESTION 1****HOTSPOT**

You are developing a Java program to play Tic-Tac-Toe. You define the following array to store the state of the board: Use the drop-down menus to select the answer choice that answers each question based on the information presented in the code. NOTE: Each correct selection is worth one point.

```
char[][] grid = {  
    {'-', '-', 'X'},  
    {'-', '-', '-'},  
    {'-', 'O', '-'},  
};
```

Hot Area:

**Answer Area**

Which array element contains an "x"?

	▼
grid[0][2]	
grid[1][3]	
grid[2][0]	
grid[3][1]	

Which array element contains an "o"?

	▼
grid[1][2]	
grid[2][1]	
grid[2][3]	
grid[3][2]	

Correct Answer:

## Answer Area

Which array element contains an "x"?

	▼
grid[0][2]	
grid[1][3]	
grid[2][0]	
grid[3][1]	

Which array element contains an "o"?

	▼
grid[1][2]	
grid[2][1]	
grid[2][3]	
grid[3][2]	

## QUESTION 2

### HOTSPOT

You are interviewing for a job as a Java developer. You need to evaluate the following code. Line numbers are included for reference only.

```
01 String s1 = "Hello world";  
02 String s2 = "Hello world";  
03 String s3 = s2;  
04  
05
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

## Answer Area

	Yes	No
s1 and s2 refer to the same object in memory.	<input type="radio"/>	<input type="radio"/>
s2 and s3 refer to the same object in memory.	<input type="radio"/>	<input type="radio"/>
A different string can be assigned to s1 on line 04.	<input type="radio"/>	<input type="radio"/>
A different string can be assigned to s2 on line 05.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

### Answer Area

	Yes	No
s1 and s2 refer to the same object in memory.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
s2 and s3 refer to the same object in memory.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
A different string can be assigned to s1 on line 04.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
A different string can be assigned to s2 on line 05.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

### QUESTION 3

#### DRAG DROP

You are writing a Java program that collects patient information and stores it in a database.

You need to ensure that the program stores data using the least amount of memory.

Which data type should you use to complete each variable declaration? To answer, drag the appropriate data type from the column on the left to its code segment on the right. Each data may be used once, more than once, or not at all. You

may need to drag the split bar between panes or scroll to view content.

Select and Place:

#### Data Types

boolean    byte    char    float    short

#### Answer Area

```
 birthYear = 1974;  
 exempt = false;  
 initial = 'D';  
 salary = 22123.5f;
```

Correct Answer:

#### Data Types

byte

#### Answer Area

short	birthYear = 1974;
boolean	exempt = false;
char	initial = 'D';
float	salary = 22123.5f;

#### QUESTION 4

##### HOTSPOT

You work on a team that develops e-commerce applications. A member of the team creates a class named DB that connects to a database. The class contains a method named query.

You need to initiate the DB class and invoke the query method.

How should you complete the code? To answer, select the appropriate code segments in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

#### Answer Area

```
DB db =  ;
```

DB()
new DB
new DB()

  

```
 ;
```

db.query()
DB.query
query()

Correct Answer:

## Answer Area

DB db = 

	▼
DB()	
new DB	
new DB()	

 ;

	▼
db.query()	
DB.query	
query()	

 ;

---

### QUESTION 5

#### DRAG DROP

You are interviewing for a job at Adventure Works, Inc. The hiring manager asks you to create a single console program.

The program takes multiple arguments from the command line and writes them to the screen in the same order as they were typed on the command line.

Which three code segments should you use to develop the solution? To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.

Select and Place:

#### Code Segments

```
public static void main(String arguments) {  
    for (int i = 0; i < args.length; i++) {  
        System.out.println(args[i]);  
    }  
    for (int i = 1; i <= Integer.parseInt(args[0]); i++) {  
        System.out.println(arguments[i]);  
    }  
    public static void main(String[] args) {  
        for (int i = 0; i < arguments.length; i++) {
```

#### Answer Area

Correct Answer:

#### Code Segments

```
public static void main(String arguments) {  
    for (int i = 0; i < args.length; i++) {  
        System.out.println(args[i]);  
    }  
    for (int i = 1; i <= Integer.parseInt(args[0]); i++) {
```

#### Answer Area

```
public static void main(String[] args) {  
    for (int i = 0; i < arguments.length; i++) {  
        System.out.println(arguments[i]);  
    }  
}
```
