### QUESTION 1

When you render a movie using the OpenGL render engine, which two features are supported? (Choose two.)

- A. Layer Styles
- B. 2D motion blur
- C. Particle effects
- D. Intersecting 3D layers
- E. Shininess property settings for 3D layers

Correct Answer: BD

---

### QUESTION 2

You use another application to modify a footage item that is used in a project. After you have saved that file, the changes are not reflected in After Effects. What is the best way to update the footage inside After Effects?

- A. select the footage item in the Project panel and choose File > Reload Footage
- B. save the project, then Select File > Open Recent Projects > Choose the first project in the list
- C. select the footage item in the Project panel and choose File > Replace Footage > File, locate the file and choose Open
- D. save the project, Quit After Effects and relaunch it, then Select File > Open Recent Projects > Choose the first project on the list

Correct Answer: A

---

### QUESTION 3

How do you undo a change and all changes after it?

- A. choose File > Revert
- B. choose Edit > Undo [action]
- C. choose Edit > History, and select the last change that you wish to undo
- D. choose Edit > History, and select the first change that you wish to undo

Correct Answer: D

---

#### QUESTION 4

You use Device Central to create After Effects compositions that match specific mobile phone models. An additional composition named Preview is also created. What is the main purpose of this Preview composition?

- A. to test Flash compatibility
- B. to mimic the physical appearance of the mobile phone
- C. to test the screen size, color depth, and sound capabilities of each mobile phone model
- D. to view your master composition in the context of several mobile devices at the same time

Correct Answer: D

---

#### QUESTION 5

Click the Exhibit button.

You have clicked on the Composition Navigator bar in the Mini-Flowchart, and you see a composition that displays the icon showed in the exhibit to its right. What does this suggest?

- A. That composition is the one you are currently viewing.
- B. That composition is not nested within any other compositions.
- C. That composition contains other compositions which are nested within it.
- D. That composition has the Collapse Transformations switch selected for a nested composition inside it.

Correct Answer: B
