Correct Answer: C

QUESTION 4

The Accounts pane of System Preferences lets you configure an account to _____.

- A. Have Read only access.
- B. Use a Simple Finder environment
- C. Recognize multiple valid passwords
- D. Log in to the computer only via FTP

Correct Answer: B

QUESTION 5

Some computers on a subnet have statically assigned IP addresses that start with "10". And others are using the built-in Rendezvous protocol to self-assign link-local IP addresses. All the computers have file sharing turned on.

What statement is FALSE?

- A. A user on a computer with a link-local address can browse a computer with a static address.
- B. A user on a computer with a static address can browse a computer with a link-local address.
- C. A user on a computer with a link-local address can browse a computer with a link-local address.
- D. A user on a computer with a static address can browse a computer with a static address by specifying the IP address.
- E. A user on a computer with a link-local address can connect to a computer with a static address by specifying the IP address.

Correct Answer: A
