QUESTION 1

A standard user enabled FileVault on his account, and did not enter a hint for his account password in Accounts preferences. Now he has lost his account password. Which procedure can an admin user follow to let this user log in again?

- A. Log in to the admin user account, open Keychain Access, open the user's login keychain, and then let the user view the account password.
- B. Select the standard user account at the Login window, click the Reset Password button, enter the master password, and then reset the account password.
- C. Log in to the admin user account, open Accounts preferences, click the Reset Password button, enter the admin user's password, and then reset the standard user's account password.
- D. Log in to the admin user account, change the privileges on the user's home folder, mount the home folder image using Disk Utility, and then reset the password in Accounts preferences.

Correct Answer: B
