QUESTION 1

An OS X Mountain Lion computer is connected to both an Ethernet and a Wi-Fi network. How can you specify which interface the Mac will use to access the Internet?

- A. Use Internet Connect to select the preferred interface, and disable the other interface(s).
- B. Enter a DNS configuration for the preferred interface, and delete the DNS configuration for the other interface(s).
- C. Assign a public IP address to the preferred interface, and a private IP address to the other interface(s).
- D. Use the Set Service Order action to move the preferred interface to the top of the Service Order list.

Correct Answer: D

QUESTION 2

Review the screenshot, and then answer the question below.

You connect an HFS+-formatted FireWire hard disk to a Mac, and configure it as shown in the screenshot. What will happen the next time a standard user attempts to mount the hard disk?

- A. The disk will mount, and the user will be able to read, modify, and delete any file on the disk.
- B. The user will be required to enter an administrator password to mount the disk; once the disk is mounted, the user will be able to read any file on the disk, but will be required to re- enter an administrator password to modify or delete files.
- C. The disk will mount, and the user will be able to read any file on the disk; the user will be required to enter an administrator password to modify or delete files on the disk.
- D. The user will be required to enter an administrator password to mount the disk; once the disk is mounted, the user will be able to read, modify, and delete any file on the disk.

Correct Answer: A

QUESTION 3

In OS X Mountain Lion, where do most applications that are NOT sandboxed store their user-specific preferences?

- A. In a preferences database file in /Library/
- B. In .DS_Store files, at the root level of ~/
- C. In a preferences database file in ~/Library/

D. In application-specific preferences files in ~/Library/Preferences/

Correct Answer: D

QUESTION 4

Which dynamic service discovery protocol does OS X use to discover devices on a network?

- A. SLP
- B. AppleTalk
- C. Bonjour
- D. DynDNS

Correct Answer: C

QUESTION 5

If you use the Get Info window to change Sharing and Permissions settings on a file or folder, Finder preserves and can revert to the previous settings until the window is closed.

- A. True
- B. False

Correct Answer: A
