QUESTION 1

Using Server app, you are configuring email alerts to be sent to an OS X Server system administrator.

Which TWO of these server events can you set to trigger an alert? (Select 2)

- A. A user has exceeded his or her assigned disk quota for file sharing.
- B. New software updates are available for the server.
- C. An unsuccessful attempt was made to log in with the root account.
- D. A certificate has expired or is about to expire.
- E. The number of files on the server has exceeded a specified number.

Correct Answer: AB

QUESTION 2

What advantage is gained by configuring the Contacts service in OS X Server to provide LDAP searches?

- A. It lets admins integrate Microsoft Exchange Server with the Contacts service.
- B. It enables third-party contact management apps to be integrated with the Contacts service.
- C. It eliminates the need for users to configure the Contacts app to perform LDAP searches.
- D. It lets the Contacts service sync contact modifications to the LDAP server.

Correct Answer: C

QUESTION 3

In OS X, which is a valid method to reset permissions and ACLs on a home folder to their default settings?

- A. Start the computer from the OS X Recovery partition, open Terminal from the Utilities menu, enter `resetpassword` at the prompt, select the system volume and the user account, and click Reset.
- B. Start the computer from the OS X Recovery partition, select Password Reset from the OS X Utilities window, select the system volume and the user account, and click Reset.
- C. Open Disk Utility from the Utilities folder on the startup volume, select the volume with the home folder, and click Repair Permissions.
- D. Select the user home folder in the Finder, choose Get Info, choose Reset Permissions from the action pop-up menu, and authenticate as the user.

Correct Answer: A

QUESTION 4
