QUESTION 1

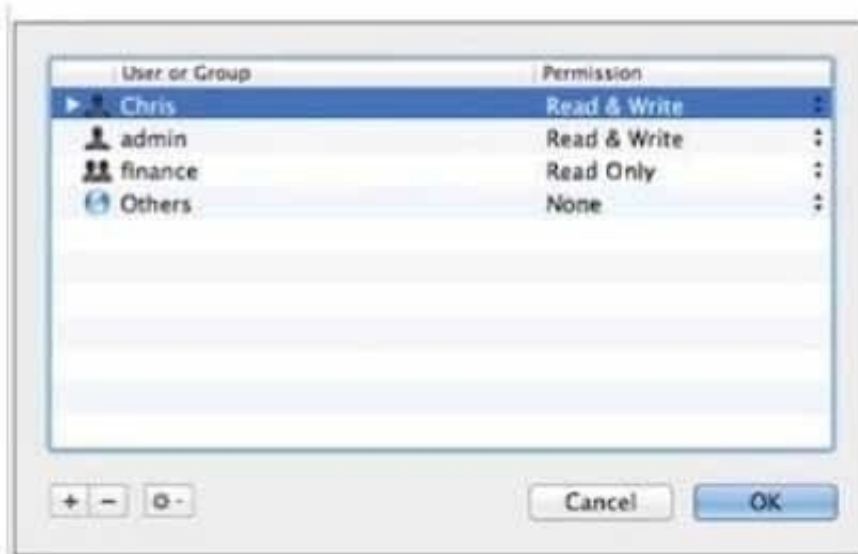

Why might you prefer to shut down and then start up a Mac you are troubleshooting, rather than simply selecting Restart from the Apple menu?

- A. Because OS X archives errors from the session to the log only during a shutdown.
- B. Because the Mac does a full POST on startup only after a shutdown.
- C. Because OS X performs disk checks on startup only after a shutdown.
- D. Because OS X loads a clean user session on startup only after a shutdown.

Correct Answer: B

QUESTION 2

After changing the permissions on the share point, what access will Chris have to the reports Folder in the share point?

- A. None
- B. Read and Write
- C. Write-only
- D. Read-only

Correct Answer: B

QUESTION 3

What advantage is gained by configuring the Contacts service in OS X Server to provide LDAP searches?

- A. It lets admins integrate Microsoft Exchange Server with the Contacts service.
- B. It enables third-party contact management apps to be integrated with the Contacts service.
- C. It eliminates the need for users to configure the Contacts app to perform LDAP searches.
- D. It lets the Contacts service sync contact modifications to the LDAP server.

Correct Answer: C

QUESTION 4

What URL should you use on an iOS device to access a WebDAV-enabled share point that is hosted by OS X Server on a Mavericks computer located at server.pretendco.com?

- A. `afp://server.pretendco.com/webdav`
- B. `http://webdav.server.pretendco.com`
- C. `http://server.pretendco.com`
- D. `webdav://server.pretendco.com`

Correct Answer: C

QUESTION 5

Using Server app, how do you configure the Websites service in OS X Server to serve website files that are stored on a volume other than the system volume?

- A. In `/Library/Web Server/Documents/`, create an alias to the folder on the external volume, then select the alias in the Web Site Configuration pane.
- B. Drag the website files from the external volume into the Websites pane.
- C. Click Add (+) to create a new website, and in the New Web Site pane choose a folder on the external volume from the "Store Site Files In" pop-up menu.
- D. Click Add (+) and add the external volume to the list of Websites service folders, then store the website files in `Library/WebServer/Documents/` on the external volume.

Correct Answer: C
