QUESTION 1

Consider the job flow diagram in the display. Which of these objects has parameters defined for it?

- A. Control table
- B. Loop transformation
- C. Inner Job
- D. Loop End

Correct Answer: C

QUESTION 2

When using the SCD Type 2 load method in SAS Data Integration Studio, which columns can be selected to check for changed data?

- A. business key columns
- B. Type 1 columns
- C. generated columns
- D. non-key columns

Correct Answer: D

QUESTION 3

In SAS Data Integration Studio, where must the columns included in a business key exist?

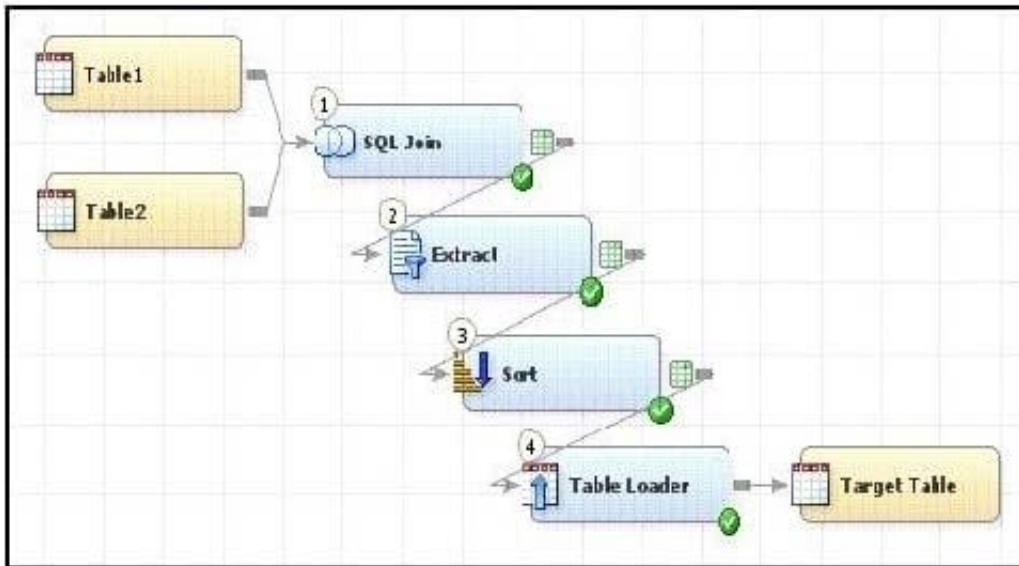

- A. in the source and standardization tables
- B. in the source and dimension tables
- C. in the target and fact tables
- D. in the source, dimension and standardization tables

Correct Answer: B

QUESTION 4

In the following display, can status handling be enabled for both the Extract transformation and the Sort transformation?

- A. Yes. The Return Code Check transformation can be added to the job flow immediately following the Sort transformation - the Status Handling tab in this Return Code Check transformation properties can then establish the desired status handling for both the Extract and Sort transformations.
- B. No. Both the Extract and the Sort transformations do not have a Status Handling tab in their corresponding properties window, therefore it is not possible to establish status handling for these transformations.
- C. Yes. The Return Code Check transformation can be added to the job flow twice, once immediately following the Extract, and again immediately following the Sort - the Status Handling tab in each of the Return Code Check transformations properties can then establish the desired status handling.
- D. Yes. The status handling tab in the job properties window will allow you to select which transformation (or even several transformations) that you want to define status handling for.

Correct Answer: C

QUESTION 5

In SAS Data Integration Studio, primary keys, foreign keys and unique keys can be specified/defined in which location?

- A. the Keys tab in the properties of a Table Loader transformation
- B. the Keys tab in the properties for any transformation
- C. the Keys tab in the properties of a table metadata object
- D. the Keys tab in the properties of a job metadata object

Correct Answer: C
