**QUESTION 1**

When using the SCD Type 2 load method in SAS Data Integration Studio, which statement is true when a change is detected?

A. the old record is deleted and the changed record is added

B. the old record is updated with the new values from the changed record

C. the old record is flagged and the changed record is added

D. the old record is merged with the changed record

Correct Answer: C

**QUESTION 2**

Which statement defines the characteristics of a SAS Stored Process?

A. SAS metadata that describes how to collect and store data sources.

B. A document that stores the steps and locations for building a data mart.

C. A SAS program that is stored on the server and described by metadata.

D. A user written SAS PROC step.

Correct Answer: C

**QUESTION 3**

How can you test the interaction of the options of a SAS Data Integration Studio Generated transformation?

A. The transformation has to be used within a job to interactively test the options with the Test Prompt button in the Options window from the properties of the transformation within the job editor.

B. The options can be tested after finalizing and saving the transformation with the Test Prompt item on the Tools menu.

C. The options can be tested only after adding all options that are assigned to the source code with the Test Prompt button in the Options window of the New Transformation wizard.

D. The options can be tested at any time after adding them to the transformation with the Test Prompt button in the Options window of the New Transformation wizard.

Correct Answer: D

**QUESTION 4**

Which statement best describes a deployment directory as used in the Schedule Manager in SAS Management Console?

A. A folder or directory location on a server where the SAS code from a deployed SAS Data integration Studio job is stored.

B. A location in the metadata repository where job flows are deployed.

C. A location in the SAS Management console job directory storing the metadata for jobs that can be added to job flows.

D. A SAS Folder in the Schedule Manager plug-in within SAS Management Console containing listings of all flows organized by server type.

Correct Answer: A

**QUESTION 5**

You want to create a job that checks conditions for your data before that data is loaded into a data warehouse. The job should be able to detect error conditions such as missing data or duplicate data and take appropriate actions like registering error conditions in log, etc. Which SAS Data Integration Studio transformation should you use?

A. Data Transfer

B. Data Validation

C. Data Quality

D. Data Extract

Correct Answer: B
