### QUESTION 1

In SAS information MAP Studio, where can you set the initial Creation Rule for relationship between data sources by default?

- A. Resource pane
- B. Design tab
- C. Properties pane
- D. Options window

Correct Answer: D

---

### QUESTION 2

A content developer wants to emphasize the indicator value shown by a dynamic gauge in SAS BI Dashboard. The content developer wants to display the color of the selected range while the other ranges remain neutral. How can this be achieved?

- A. Change the other colors in the range to be a neutral color.
- B. Select the gauge type to be a Dynamic Speedometer.
- C. Check the Ghost checkbox on the select a gauge screen.
- D. Alter the style to support shadowing.

Correct Answer: C

---

### QUESTION 3

In order to create prompt, a content developer has created a "PromptBuilder" stored process. The developer uses this stored process to create prompts and prompt group then save into metadata.

A second content developer has decided to use some of the shared prompts stored in metadata in a new stored process. The second developer has realized one of the shared prompts needs to point to a more recent data source. The two developers agree the update needs to be made:

Where should the shared prompt be updated and who can make the update?

- A. In any stored process using the shared prompt, only by an unrestricted user
- B. In the metadata location where the shared prompt is stored, only by an unrestricted user
- C. In any stored process using the shared prompt, by anyone with appropriate permissions
- D. In the metadata location where the shared prompt is stored, by anyone with appropriate permissions

Correct Answer: D

---

#### QUESTION 4

Which of the following is FALSE regarding the Information Maps LIBNAME Engine?

- A. The engine provides read-only access to the data presented by the information map.
- B. The engine is associated with a collection of information maps instead of a physical storage location.
- C. SASIOIME is an alias for the INFOMAPS engine name used in the libname statement.
- D. The engine provides the ability to modify the information map and the underlying data.

Correct Answer: D

#### QUESTION 5

Refer to the exhibit.

A user is creating a Custom Filter in SAS Web Report Studio. The Get Values button is grayed out and there is a message saying that the data item does not allow available values to be displayed.

Which change would need to be made to the information map to allow the user to use the Get Values button?

- A. Create a prompting Filter in the information map that only allows the user to type a value.

- B. Alter the value generation method of the data item to either select from a static or a dynamic list.
- C. Change the item type from a measure to a category.
- D. Values cannot be displayed for this type of data.

Correct Answer: B
