QUESTION 1

A user saves a Microsoft PowerPoint presentation that has a SAS Stored Process in it. The user then emails the presentation to a co-worker who also has the SAS Add-In for Microsoft Office. When the coworker opens the PowerPoint presentation, what happens to the stored process output?

- A. The output does not display.
- B. The output is static.
- C. The output can be refreshed.
- D. A prompt appears asking if the co-worker wants to refresh the stored process.

Correct Answer: C

QUESTION 2

In SAS Information Map Studio, how are cascading prompts created?

- A. Create a compound filter with prompts and establish dependencies between prompts
- B. Use the cascading prompt wizard located on the tools menu
- C. Create individual filters and link them together on the relationships tab
- D. Create individual prompted filters and establish dependencies between filters option

Correct Answer: D

QUESTION 3

Which language is used to query SAS OLAP Cubes?

- A. SQL
- B. OLE DB for OLAP
- C. MDX
- D. O-SQL

Correct Answer: C

QUESTION 4

Refer to the exhibit and note the error.

The screenshot shows the configuration interface for an indicator named "Orion Star Test". The interface has tabs for "Indicator", "Links", "Display", and "Configure". The "Configure" tab is active. The configuration includes:

- Name: Orion Star Test
- Data model: Orion Star Test (with Edit... and New... buttons)
- Display: KPI
- Display Settings section:
 - Definition name: Value
 - Range: Chocolate Enterprises Cases Range (with Edit... and New... buttons)
 - Gauge type: Dynamic Speedometer (with Select... button)
 - Set the range data source properties.
 - Warning: No values returned. Error occurred generating result set.
 - Primary: (empty dropdown)
 - Secondary: <None>

The data model for this SAS BI Dashboard has been built using a SAS Information Map. What is the reason for the error?

- A. The SAS Information Map used as a data source does not have a measure defined.
- B. The content developer does not have the ReadMetadata permission on the SAS Information Map.
- C. The SAS Information Map was built using an OLAP Cube.
- D. The gauge type for the indicator is not correct and needs to be changed.

Correct Answer: A

QUESTION 5

In order to create prompt, a content developer has created a "PromptBuilder" stored process. The developer uses this stored process to create prompts and prompt group then save into metadata.

A second content developer has decided to use some of the shared prompts stored in metadata in a new stored process. The second developer has realized one of the shared prompts needs to point to a more recent data source. The two developers agree the update needs to be made:

Where should the shared prompt be updated and who can make the update?

- A. In any stored process using the shared prompt, only by an unrestricted user
- B. In the metadata location where the shared prompt is stored, only by an unrestricted user
- C. In any stored process using the shared prompt, by anyone with appropriate permissions

D. In the metadata location where the shared prompt is stored, by anyone with appropriate permissions

Correct Answer: D
