QUESTION 1

A DBA wants to migrate a DB2 LUW 8.2.2 database to version 9.7 and plans to use currently committed (CC)

semantics on an application-by-application basis. Which process will yield the desired results?

A.

Set the DB2_USE_CC_SEMANTICS registry variable to YES, then migrate the database.

B.

Migrate the database, then assign the value ON to the CURR_COMMIT configuration parameter.

C.

Set the DB2_USE_CC_SEMANTICS registry variable to APPLICATION, then migrate the database.

D.

Migrate the database, then assign the value AVAILABLE to the CURR_COMMIT configuration parameter.

Correct Answer: D

QUESTION 2

A table named TAB_A was created with the COMPRESS YES option specified and populated with 100,000 rows. If a DBA wants to create an index on table TAB_A, which statement is true?

A. In order for the index to be compressed, it must be enabled for compression by specifying the COMPRESS YES option with the CREATE INDEX statement that is used to create it.

B. The index will automatically be compressed since the table it is associated with is compressed; the ALTER INDEX command does not have to be executed.

C. In order for the index to be compressed, it must be enabled for compression by specifying the COMPRESS YES option in the CREATE INDEX statement used to create it; however, the index will not be compressed until the ALTER INDEX command is used to create an index compression dictionary.

D. The index will automatically be enabled for compression because the associated table is compressed; however, the index will not be compressed until it is REORGed.

Correct Answer: B

QUESTION 3

An active partitioned instance named DB2INST1 uses the following db2nodes.cfg file: 1 server1 0 2 server1 1 3 server1 2 4 server1 3 The following command is issued to add a new database partition: db2start DBPARTITIONNUM 5 ADD DBPARTITIONNUM HOSTNAME server1 PORT 4 Upon successful completion of the db2start command, which

statement is true regarding the status of the instance DB2INST1?

- A. Partitions 1, 2, 3, 4, and 5 are active and available.
- B. Partitions 1, 2, 3, and 4 are active, but partition 5 is not.
- C. All partitions are active but partition 5 is not available until a temporary table space is defined.
- D. DB2 responds to the configuration change by stopping all partitions.

Correct Answer: B

QUESTION 4

When an agent that is connected to the database finishes its work of successfully processing a query, what happens to the agent?

- A. It terminates immediately.
- B. It remains active as long as the MAXAGENTS setting is not exceeded.
- C. It is placed in the agent pool if the connection is terminated.
- D. It automatically releases the database connection and returns to the pool.

Correct Answer: C

QUESTION 5

Which statement is correct about statistical views?

- A. A statistical view is created by executing runstats on a regular view.
- B. A statistical view holds information about the system catalog statistical tables.
- C. A statistical view provides the optimizer with additional correlation statistics.
- D. A statistical view provides the optimizer with more accurate cardinality estimates.

Correct Answer: D
