QUESTION 1

Which role does WS-Security play in an SOA?

- A. It provides security interchange for RESTful Web services.
- B. It enforces authentication and authorization within an SOA.
- C. It provides an end-to-end security context among Web services.
- D. It provides a security implementation for Enterprise Service Buses (ESB).

Correct Answer: C

QUESTION 2

What is a role of an Enterprise Service Bus (ESB) in SOA management?

- A. To provide the governance of services by limiting who can access services
- B. To provide point-to-point connection of service consumers and service providers
- C. To provide flexibility that allows business process inefficiencies to be rapidly corrected
- D. To ensure a seamless flow of information from anywhere at any time using a variety of protocols

Correct Answer: C

QUESTION 3

Which two statements about security considerations in an SOA environment are true?

- A. Firewalls or routers are the mechanisms for securing an SOA business environment.
- B. Security policy decisions are made and carried out within an Enterprise Service Bus (ESB).
- C. Identities exist for both users and services, and both must be subject to the same controls.
- D. The creation of roles for business process task lists are used to prevent business partner access to protected assets.
- E. There is a need to manage identity and security across a range of systems and services that are implemented in a diverse mix of new and old technologies.

Correct Answer: CE

QUESTION 4

Which advantages does the Enterprise Service Bus (ESB) have over point-to-point solutions?

- A. Flexibility and cost
- B. Redundancy and agility
- C. Performance and scalability
- D. Versatility and adaptability

Correct Answer: D

QUESTION 5

What is contained in an SOA repository as opposed to a registry?

- A. Service policy information
- B. Versions of software components
- C. Uncommitted transactions to enable compensation handling
- D. Service endpoint information to facilitate dynamic binding at runtime

Correct Answer: A
