QUESTION 1

What is a typical requirement in an SOA environment for determining business success?

- A. Adherence to six-sigma business guidelines
- B. A dashboard for reporting metrics to business analysts
- C. The ability to pilot the solution in a production environment to business stakeholders
- D. The capability to monitor and measure performance against business process goals

Correct Answer: D

QUESTION 2

A recent strategic corporate directive is demanding a decrease in the operational budget of a cargo airline by 2%. The CIO has indicated a shift to SOA can help gain efficiencies in development costs. The company has just signed a partnership with a package delivery company that requires integration between the systems of the two companies. When preparing for SOA adoption, what is most important to document to show Return on Investment (ROI) from the shift to SOA?

- A. The current operational budget for the company and the partner company
- B. The current IT governance overlap between the company and the partner company
- C. The current Key Performance Indicators (KPIs) for the company and the partner company
- D. The estimated cost for point-to-point integration with the partner company using the current messaging system

Correct Answer: D

QUESTION 3

From an IT perspective, what are three goals of moving to SOA?

- A. Increasing the IT budget
- B. Implementing packaged applications
- C. Giving IT the maximum number of options to solve a business challenge or problem
- D. Exhibiting IT systems as evidence that the company is at the forefront of technology
- E. Viewing the operating environment as a set of services provided by the underlying IT infrastructure
- F. Improving Return on Investment (ROI) on IT assets by breaking traditional monolithic systems down into more manageable pieces

Correct Answer: CEF

QUESTION 4

In applying SOA, which principle can reduce overall cost?

- A. Reuse services across lines of business.
- B. Build services for only the most important business functions.
- C. Build general services that can perform a variety of business tasks.
- D. Reimplement all services on a consistent hardware and software platform.

Correct Answer: A

QUESTION 5

Which SOA architectural concept is applied as an organization combines services to perform a business process?

- A. Modularity
- B. Composition
- C. Encapsulation
- D. Separation of concerns

Correct Answer: B
