QUESTION 1

An administrator needs to list/query the security attributes for the WPAR syswpar1. Which command will do this?

- A. Issecattr-W syswpar1
- B. Issecconf-w syswpar1
- C. Isattr-s syswpar1
- D. Iswpar-S syswpar1

Correct Answer: D

QUESTION 2

A system administrator needs to create a new volume group (VG) which will contain 100 physical volumes. The physical volumes are 10GB in size. The company plans to increase from 100 to 150 physical volumes over a two year period. To ensure the VG can meet initial demand and grow without requiring changes at later date, what type of VG should be created?

- A. Create VG as a Big volume group.
- B. Create a volume group setting each physical partition size to 1024 MB.
- C. Create VG as a Scalable volume group.
- D. Create VG using the t-factor attribute

Correct Answer: C

QUESTION 3

Which action will temporarily disable remote login access using telnet and ssh for all non-root accounts?

- A. Update /etc/security/passwd and recycle the inetd subsystem.
- B. Stop the sshd subsystem.
- C. Create a/etc/nologin file.
- D. Set the PermitLogins parameter in /etc/ssh/sshd_config and recycle the sshd daemon.
- E. Touch the /etc/sshd/nologin file and recycle the sshd daemon.

Correct Answer: C

QUESTION 4

When updating a device attribute utilizing the -P flag with the chdev command, which of the following is true?

- A. The device attribute will be updated for the parent of the device specified.
- B. The device attribute is updated forcibly and will result in the device changing to the defined state.
- C. The device attribute is updated immediately and will not be maintained after the next system boot.
- D. The device attribute is updated only in the ODM and does not take affect until after the next system boot.

Correct Answer: D

QUESTION 5

Why does the following ksh code segment fail to run?

```
if [ $src -eq 0 ] ; then
    echo "Command completed successfully."
    exit $src
elseif [ $src -eq 101 ] ; then
    echo "Command failed with debug return code 101."
    exit $src
fi
```

- A. An alphanumeric operator is being used to compare the integer variable.
- B. The \if statement must be terminated with an \end1 keyword.
- C. The \elseif keyword is not valid within ksh scripts.
- D. The segment is missing an \else\ default statement.

Correct Answer: C
