QUESTION 1

Which statement is true for broadcast network traffic?

- A. Broadcast is designed to enable optimized video transmission, since it tolerates network dropouts
- B. Broadcast is not practical for network video transmission, since packets are transmitted to every device on the network
- C. Broadcast is a method for sending video to many recipients over the internet even though their bandwidths vary
- D. Broadcast data packet length is longer than normal Ethernet packets, to accommodate a full video frame

Correct Answer: B

QUESTION 2

Which is true about P-iris?

- A. The P-iris makes use of a novel p-shaped blade that reduces complexity and cost while maintaining image quality
- B. In bright situations. P-iris limits the closing of the iris to avoid blurring caused by diffraction when the iris opening becomes too small
- C. The P-iris delivers the optimal depth of field by always using the smallest possible aperture for the available lightning
- D. The P-iris makes use of a novel p-shaped blade that allows the iris to react to rapidly changing lighting conditions

Correct Answer: B

QUESTION 3

Ghost image is when

- A. The lens is using too high f-stop value.
- B. The shutter time is too long.
- C. The gain is too high.
- D. The frame rate is too low.

Correct Answer: B

QUESTION 4

What is the main purpose of the Arctic Temperature Control functionality?

- A. To protect the camera electronics
- B. To protect the camera mechanics
- C. To protect the camera lens
- D. To protect the camera power

Correct Answer: B

QUESTION 5

Match each function to the correct video surveillance system component. Drag each gray box from the left column to the matching blue box in the right column.

Network camera	Exports video
Ethernet switch	Connects twisted pair with fiber optic cabling
Video Management System	IEEE 802.1X authenticator
DHCP server	Compresses video data
Media converter	Allocates IP addresses to cameras

Select and Place:

Network camera	Exports video
Ethernet switch	Connects twisted pair with fiber optic cabling
Video Management System	IEEE 802.1X authenticator
DHCP server	Compresses video data
Media converter	Allocates IP addresses to cameras

Correct Answer:

	Media converter
	Network camera
	DHCP server
	Video Management System
	Ethernet switch
