QUESTION 1

Which of the following would be applicable as part of a test policy for testing these types of systems?

a.

Systems must be tested for compliance to industry standard routing protocols.

b.

Testing for the latest upgrade will require testing of increased network traffic of 100%.

c.

Testing for the fix will require the use of dynamic analysis tools.

d.

Releases will not be made if systems have any high priority defects outstanding.

A.

a and b.

B.

a and d.

C.

b and c.

D.

b and d.

Correct Answer: B

QUESTION 2

Which of the following activities should be carried out at the start of this process?

A. Marketing of the service to as many people as possible to reduce the risk of poor revenues.

B. Holding a workshop with as many stakeholders as possible to gain their views on the risks to the product and project.

C. Meeting with the project manager to agree a bigger budget.

D. Meeting with the development manager to agree defect fix turn-around times.

Correct Answer: B

QUESTION 3

When a software defect in a system has been found and fixed, which of the following activities should be undertaken next?

a.

 Debugging.

b.

 Confirmation testing.

c.

 Regression testing.

d.

 System testing.

e.

 Static testing.

A.

a and b.

B.

b and c.

C.

c and d.

D.

c and e.

Correct Answer: B Case Study# 4Scenario

A bank is upgrading its systems to include an on-line investment service, allowing investors to trade with

each other, in a mini-stock market environment.

The upgrade will be carried out using Agile development (within the Scrum framework). Here, the iterations

are referred to as Sprints. For each Sprint the required functionality will be defined as a set of user-stories.

The user stories are typically 1-2 lines long, indicating what the business wants the system to do. These

user stories will be built then tested.

There will be 3 Sprints:

1) Creation of the mini-stock market trading environment.

2) Creation of additional front-end enhancements.

3) Linking to stock exchange for pricing.

You are the test manager. You lead a team of 4 testers, and there are 6 developers. Your team has worked on Agile projects previously, and on average, Sprints usually last 4 weeks. At the end of all Sprints, a full end to end test is carried out. This is called the E2E test phase. You are worried that 4 weeks will not be sufficient time for the first Sprint. You have decided to conduct a Risk Management exercise before the project starts.

QUESTION 4

Which of the following best describes the order in which this should be carried out?

a.

Decide which category of test design technique to use.

b.

Review test specifications.

c.

Write test procedures.

d.

Create test cases.

e.

Identify test conditions.

A.

a, b, d, e then c.

B.

b, e, a, d then c.

C.

b, a, d, c then e.

D.

e, b, a, d then c.

Correct Answer: B

QUESTION 5

You need to test that the rules have been correctly set up in the configuration table, according to the specification. Which one of the following test design techniques would be most suitable for this?

A. Data flow testing.

B. Statement testing.

C. Decision table testing.

D. Boundary value analysis.

Correct Answer: C
