QUESTION 1

Using the client performance monitor function, an administrator has the capability to gather and analyze performance data about backup and restore operations for an IBM Tivoli Storage Manager client. What data can be analyzed?

- A. storage pool, occupancy, and retention
- B. processor, disk, and network utilization
- C. memory, user, and tape drive utilization
- D. policy domains and management classes

Correct Answer: B

QUESTION 2

What is needed for empty tape volumes to be available for use with IBM Tivoli Storage Manager (TSM) V6.3?

- A. Tapes checked into the library as scratch.
- B. Tapes labeled and checked into a scratch pool.
- C. Tapes registered with TSM command in the library volume table.
- D. Tapes assigned a scratch status and entered into the TSM database.

Correct Answer: A

QUESTION 3

When installing IBM Tivoli Storage Manager Backup-Archive client in a clustered server environment, where should the DSM.OPT (or DSM.SYS) file be located?

- A. on the shared disk
- B. on the common files folder
- C. in the default installation location
- D. in the same location on each cluster

Correct Answer: A

QUESTION 4

A company writes a Service level Agreement (SLA) for their backup customers. This is a description of the default service level:

- All files backed up from the client node are governed by the "standard" management class.
- The current version, and up to two (2) previous versions, of a file will be kept in data storage when the file exists on the client node.
- If the file no longer exists on the client node, it and its two (2) previous versions remain in data storage.
- Deleted and previous versions will be retained for at least 30 days.

Which command conforms to the company's SLA?

- A. define copygroup standard standard standard verexist=30 verdel=3 retex=3 reto=30
- B. define copygroup standard standard standard verexist=30 verdel=30 retex=3 reto=3
- C. define copygroup standard standard standard verexist=2 verdel=3 retex=30 reto=30
- D. define copygroup standard standard standard verexist=3 verdel=3 retex=30 reto=30

Correct Answer: D

QUESTION 5

An IBM Tivoli Storage Manager V6.3 administrator has been employed at a customer site. How will the administrator find out details regarding the current management classes and domains along with copy groups?

- A. q MGMT F=D
- B. q COPYGROUP * * *
- C. q STG - COPYGROUP F=D
- D. q ADMIN - MGMT - DOM F=D

Correct Answer: B
