QUESTION 1

What is the most efficient way to add an additional 10 new entries to an existing list?

- A. Use a workflow to add the new list values.
- B. Use Data Integrator to import a new list with the new values.
- C. Select the list, enter all the values, and then save the entries.
- D. In the form that lists the values, enter each value as it is needed for that particular record.

Correct Answer: C

QUESTION 2

When do we define the additional fields to be populated along with the locator field?

- A. At runtime in the record with the Edit Map command.
- B. After the locator field has been saved, with the Edit Map command.
- C. At the same time that the locator field is first created and before it is saved.
- D. After the locator field has been saved, from the additional fields own Edit Map properties.

Correct Answer: B

QUESTION 3

An editable query has been created with the name triPeople - triRetired - Editable. The query designer wants to allow the user to be able to unretire multiple records. When the designer goes to set the state in the editable query she does not see the option to set this property. What could be the problem?

- A. The developer has not set the editable property to Yes.
- B. The query type has been set to Report. This type of query is not editable.
- C. There are no editable fields in the triRetired state so this state is excluded.
- D. The record has been set to be uneditable in the triRetired state, so an editable query cannot be created

Correct Answer: A

QUESTION 4

In the Admin Console DataConnect tool, what is the purpose of Force Clean Up?

- A. It fails the completed DataConnect jobs.

- B. It retries the completed DataConnect jobs.
- C. It redies the completed DataConnect jobs.
- D. It removes the completed DataConnect jobs.

Correct Answer: D

QUESTION 5

A customer has complained that an error message is showing up after they close and reopen the form. It is discovered that a synchronous workflow controls the error message process.

What should be changed so that the error message displays while the form is open?

- A. Change the synchronous workflow to use temporary data.
- B. Change the synchronous workflow to use permanent data.
- C. Change the synchronous workflow to trigger from a state action.
- D. Change the synchronous workflow to an asynchronous workflow.

Correct Answer: A
